Laborites Said to Prepare to Nationalize Oil LONDON, July 7 (AP). The the state to get a bigger stake is ready to make the nationaliza-

Labor government has decided to nationalize Britain's North Sea oil fields, the Sunday Telegraph newspaper reported today. Government officials declined comment but some oil company officials warned that the reported plan will endanger development

The Telegraph, which supports the Conservative party, said that the Labor government has decided on a sweeping nationalization program for the North Sea fields and will announce it shortly.

Nationalization is a political issue in Britain and any plan af-fecting the North Sea oil and gas fields will face opposition from the Conservatives and from the oil concerns drilling off Britain's east coast, Many of these firms are controlled by U.S.

Labor has long campaigned for

in the North Sea fields. The campaign has been heightened by the energy crisis.

Britain, which imports virtually all its oil, hopes by 1980 to be able to produce from the North Sea at least the 100 million tons it uses every year. The first commercial flow from the fields is due late this year.

The minority Labor government opened negotiations with the oil companies when it took office in March. The oil companies were said to have realized they would have to make concessions and some industry sources reported that they were willing to accept taxation on up to 80 per cent of their earnings, But they balked at a state take-over.

A major factor in Labor's plans, as reported by the Telegraph, is the prospect of a general election this fall, Labor, the paper said,

tion plan a major campaign issue. The Telegraph said Energy secretary Eric Varley would propose four main points, with the

 Taking a majority holding in all North Sea operations, probably 51 per cent. • Increasing greatly the cost of development licences awarded

to oil groups for prospecting and production rights. · Setting up a state-owned perchasing organization, to which companies operating in the North Sea will have to sell their oil.

 Insuring that a substantial part of the North Sea profits go to Scotland, apparently to counter the upsurge of Scottish nationalism that hurt Labor in the Feb. 26 national election. The nationalists say that the oil fields off Scotland belong to that country, not to Britain as a whole.

Simon Will Tour Mideast, Europe

WASHINGTON, July 7 (AP) .-Treasury Secretary William Simon will lead a delegation of energy and finiancial experts to the Middle East next Thursday for a series of talks on petroleum production and oil priess

The trip was described by a Treasury Department spokesman last night as a follow-up to President Nixon's recent Middle East journey. "The whole trip is energy oriented ... petroleum production and marketing and certainly the price," the spokesman

After meetings in Saudi Arabia, Egypt and Israel, Mr. Simon will travel to Europe for meetings with finance ministers in Bonn Paris and probably London, the spokesman added.

The new measures are the most important taken since the provisional government came into office three weeks after a militar? coup overthrew the dictatorial regime on April 25. measures combine economic incentives with attempts to establish greater social justice in a country where political repression was accompanied by great extremes of wealth and of poverty,

The measures were drawn up under the direction of Vasco Vieira de Almeida, the 42-yearold minister of economic coordination a former banker and economist who has become one the most dynamic figures in the new regime. At a news con-ference on Friday night, he warned the Portuguese that their new freedom required discipline and responsibility and appealed for cooperation "to meet the challenge of constructing a new country.

Highest Inflation Rate

He pointed out that Portugal was faced with the contradictory need of controlling "the highest rate of inflation in Europe"-about 30 per cent-while expanding the economy. At the same time, he sought to put an end to a fear held by both native and foreign businessmen—the: the April revolution, which brought leftists into political power, spelled the end of capitalism in Portugal. He said the private sector had a vital role **to play and he denied any inten**tion to assume state ownership, except for those industries in volved in national defense. Among the major measures

• Incentives for greater bankcredit facilities for investment through an increase in interest rates for savings accounts and a lowering of reserve requirements

• More effective control of prices of raw materials and food at production levels rather than at retail levels, where controls are difficult to enforce. Stimulation of farm production to replace high-priced imports on the country heavily de-

• Incentives for low-cost housing construction to relieve the housing shortage, depress the high level of rents and provide work for the unemployed Public works projects will also be pushed

· An increase in taxes on higher incomes, on farm land not being exploited and on urban building sites being kept idle for speculative purposes. — increase taxes will also be imposed on luxury goods.

• An increase in wages for low-paid government, civil and military employees. A minimum wage has already been set for private industry and the minister indicated further wage increases would depend on increases in (Continued on Page 2, Col 4)

Turks Welcome U.S. Aid in Ending Opium Smuggling

ANKARA, July 7 (AP).-The Turkish government today said s would welcome any help the United States might offer in controlling the outflow of illegal opium from Turkish poppy fields. Relations between the two countries became strained after Premier Bulent Ecevit's government announced last Monday that Turkey was lifting a ban on opium poppy cultivation that was imposed in 1971 at the urg-

Army, Cabinet **Press Talks** In Ethiopia

-The army and the cabinet renewed their efforts today to form a compromise government to run the country and end a 10-day-old military take-over of

Emperor Halle Selassie called the parliament into special session tomorrow to push through a new constitution granting ex-tensive power to the people for the first time and stripping the monarch of many of his traditional rights.

"They [the cabinet] have the authority, but we have the power," a member of the army's central committee said in an interview. "What we must do now is to integrate these two things into a viable government." Meanwhile, the army has nam-Abiy Abebe, as the number-one person on its wanted list. Western diplomats said yesterday.

prominent Ethiopians it accused of corruption under former governments, but Gen. Abebe apparently slipped through the military dragnet of the capital city : The central committee directed the army take-over and is comprised of an unknown number of military personnel ranging in rank from private to major. Little else is known of their per-

Since seizing power, the mili-

sonalities or alms. "That would be too dangerous for our movement at this stage." the committee member said when asked to identify other members during the interview.

"We do not want bloodshed." the officer said. "Ours is a peaceful movement dedicated to a new constitution. We are meeting with cabinet representatives constantly. But I don't know how long it will take before the country is returned to normal."

The army is also continuing to arrest Ethiopians suspected of corruption, but the officer said: "I cannot release the list of men on our most wanted list. But we have not arrested any members of the royal family"-a reference to reports last week the army had detained Haile Selassie's grandson, Rear Adm. Eskinder Desta.

morning church services and then retired to his palace for what aides said would be a day of relaxation. In a statement last night, the Emperor for the first time publicly backed the wave of army arrests, saying: "Among the causes of unrest are the selfish motives and greed for power among government officials."

He also recalled the parliament from a summer recess to begin work on approving a new constitution which the army demanded as one condition for its eventual withdrawal from key installations in Addis Ababa.

Hungary Reports Use Of Birth Pill Rising

BUDAPEST, July 7 (Reuters) —Hungarian women are turning increasingly to the contraceptive pill as an alternative to abortion to restrict the size of their families, according to official status-

An average of 362,000 women each month took the pill during the first half of this year, 54 per cent more than in the same pe riod last year. Abortions dropped by 40 per cent to 53,000 during the same six months. The gov-ernment introduced strict curbs on abortion last October to counter a dwindling birth rate.

TOKYO, July 7 (WP).—The half a century ago. The new United States is on the verge American domain is the proposed "Commonwealth of the Northern Marianas." a thirtiy populated island chain 5.000 miles southwest of California.

Negotiations which have taken place without much notice over the last 14 months recently have resolved nearly all the fundamental questions between repre-sentatives of the islanders and the official U.S. delegation headed by special presidential repre-sentative Franklin Williams. In an interview last week, Mr. Williams said he hopes for agree-ment on final terms this fall and their submission to Congress possibly in the first days of next

The major reason for U.S. interest in the new territory is the Pentagon's plan to build a \$300million air-naval base on Tinian, the flat-topped volcanic island from which the U.S. Air Force launched its 1945 atomic-bomb raids on Hiroshima and Nagasaki. Japan, which used Tinian and nearby Salpan as major bases until pushed off by U.S. landings in World War II, is 1,500 miles to the north

Mr. Williams, chairman of the San Francisco-based Asia Foundation, sald the Joint Chiefs of Staff and the Defense Department have officially determined a national "requirement" for the Tinian base, "including air operations and forward deployment of war material and war reserves." According to Mr. Williams, President Nixon approved the plan in 1971 and reaffirmed it in 1972 following a National Security

2.500-Man Garrison

So far, Congress has not been asked to authorize either the proposed base on Tinian or commonwealth status for the Northern Marianas chain of which the island is a part. Nevertheless detailed planning for construction of the base is far along, including projections of a permanent garrison of 2,500 men plus depen-

As part of the commonwealth negotiations, the United States "tentatively agreed" to pay \$13.5 million yearly for seven years plus \$3 million yearly in services to support the region. The population of the pro-posed "commonwealth" would be

Mr. Williams said he has consuited informally on the plan with key lawmakers, who "led me believe Congress is favorably disposed and encouraged in our efforts."

The proposed Tinian base and the U.S. installations on nearby Guam 'a U.S. territory acquired widely expected to be the American "fallback position" in the western Pacific when and if U.S. forces leave South Korea, mainland Japan, Okinawa, the Philippines. Taiwan and other present

'No Plans' to Redeploy

Mr. Williams said there are "no present plans" to redeploy major of erational units to Tinian from elsewhere in Asia but did not deny that this would be a possibility. "The plans are to go forward [with the Tinian base] regardless of whether we redeploy," he said.

Most of the residents of Tinian, Saipan and the other inhabited parts of the proposed "Commonwealth of Northern Marianas are believed to be in favor of permanent affiliation with the United States. However, no test votes have been taken recently and a proposed referendum on Tinian alone was vetoed by U.S. authorities early this year, on grounds that this is a decision for the entire Northern Marianas chain.

Since the end of World War II. the Northern Marianas and other parts of the vast mid-Pacific empire of Micronesia have been administered by the United States as a trusteeship under United

Two Ex-Policemen 'Confessed'

Lisbon Said to Hold 3 in Delgado Killing

LISBON, July 7 (NYT),-At least three persons are reported under arrest here on charges of having participated in Portugal's most notorious political crime— the slaying of Gen. Humberto Delgado, once the leader of opposition to the ousted dictatorship. Foreign Minister Mario Soares,

a former attorney to the Delgado family, announced last week at a political rally that two members of the old regime's political police being held in Caxias Prison near Lisbon had confessed to taking part in the killing. Gen, Delgado's beaten body and

the body of his secretary were found by two boys nine years ago in a shallow grave just across the border in Spain. The general had disappeared on Feb. 13, 1965. after a clandestine visit to the Spanish border town of Badajoz, where he is believed to have gone to meet other opposition militants. Mr. Soares said that Gen. Delgado's body, now buried in a cemetery in the Spanish town of Villanueva del Fresno, would be brought back to Portugal and his army rank, stripped from him by the late Premier Antonio de Oli-

veira Salazar, would be restored Group Disbanded

Just after the April coup, the old regime's secret police was disbanded and hundreds of its memhers were imprisoned. Among those arrested were the two policemen who later confessed. One is identified as Antonio Gonçalves Semedo, a former border official. Three weeks ago a third suspect. Ernesto Ramos Lopes, a political official in Angola, reportedly was arrested in Luanda, the

Lawyers who have followed the affair say the inquiry is just beginning and they complained that it was not being pursued diligently enough by the criminal police. A young police inspector is said to be working on the case virtually alone. The lawyers were also skeptical of the value of the

He indicated the government has switched from formal conferences to what he called "confidential contacts' in an effort to solve the country's dilemna over Angola, Mozambique and Portuguese Guinea, called Guinea-Bissau by the insurgents

He said he expects the contacts to produce "positive results soon, cially in Guines."

Mr. Soares said there was no fixed date for the resumption of formal cease-fire talks with the Airican party for the Independence of Guinea-Bissau and the Cape Verde Islands, Talks between the Portuguese government and the PAIGC broke off after meetings in London and Algiers. The foreign minister also indicated that talks "scheduled in principle before July 15" with Frelimo, the Mozambique liberation movement, would not take place by that date,

Peron's Aide Controversial

(Continued from Page 1) politicians as a member of "the family —a term commonly used here to describe the closely knitgroup formed by Peron, Isabel Peron, Mr. Lopez Rega and his daughter, Norma, and her hus-band, Raul Lestiri, who was in-terim president of the nation when Peron forced Hector Campora out of office.

Mr. Lopez Rega remains an unpopular figure among non-Peronist moderates and conservatives partly because his power is rooted solely in his personal con-nection with the Perons, and partly because of the occasional awkwardness of his public state-

Last month, returning from a trip in which he accompanied Peron on state visits to several European countries and the Vatican, he raised a number of eyebrows by describing Pope Paul VI as "a man with yery high moral values."

Decree Angers Foes

He also attracted the anger of non-Peronists when a government decree in May granted him the rank of retired general commis-sioner of the federal police, despite the fact that he retired from the force as a corporal in

Last March, following the police shooting of a slum-dweller during an abortive protest march on tivity. A decrease in African colonies in an attempt the Ministry of Social Welfare, Montoneros, a left-wing Peronist guerrilla group, took out advertisements accusing Mr. Lopez Rega of responsibility for the incident and threatening him with death.

Despite the controversy, Mr. Lopez Rega remains an intensely private man and little is known

of his background. He became Peron's private secretary in 1965 after being introduced to Isabel Peron when she visited Argentins that year on

behalf of her exiled husband. His interest in astrology reportedly remains intense: wrote on the subject during the early 1960s. Although it achieved itmited circulation, the bestknown of his works was published in 1963 and entitled, "Alpha and Omega: A Message for Humanity." According to the author, the thoughts contained in the volume were transmitted to him by the Angel Gabriel.

Kissinger Is Said to Believe U.S. Needs to Review Power

(Continued from Page 1) for a midterm nuclear arms limi-tation accord that could extend to 1985, a senior U.S. official

During these private attempts

to set a new pattern, it was disclosed, Mr. Kissinger had a discussion with a powerful member of the Soviet Polithuro, Dmitri Ustinov, who previously has not been identified with such subjects as nuclear arms limita-tion. Mr. Ustinov is the Politburo member in charge of defense industry and space.

Twice Delayed Mr. Kissinger's discussions with

Soviet Foreign Minister Andrei Gromyko twice were delayed during the most critical days of negotiation. Monday and Tuesday, because of meetings of the Soviet Politburo to examine the idea of a nuclear accord which would run for about 10 years. It was disclosed vesterday by U.S. officials that an illustrative range of possible limitation on nuclear weapons—with examples of numbers—was mentioned by the United States to the Soviet

The main thrust of the U.S. contention, which Mr. Kissinger is pursuing actively, is that numbers alone do not provide security for either side. The Soviet concern, Mr. Kis-

singer is emphasizing in his rounds of talks, is still overwhelmingly focused on Russian inferiority in number of warheads deployed compared to the United States, while military leaders and their supporters in Congress are alarmed about the

Soviet Union gaining numerical superiority when they could eatch up in multiple nuclear warheads. The Russians have an advantage in the total number of missile

Schmidt, Kissinger Confer MUNICH, July 7 (AP) .-- Mr. Kissinger and Chancellor Helmut Schmidt agreed today that the European security conference could be completed before the end of 1974, Mr. Schmidt's spokesman reported.

If the security talks under way in Geneva are successful, then a summit conference is likely to follow, spokesman Klaus Boelling reported after Mr. Kissinger and Mr. Schmidt met for 95 minutes. Both then attended the World Cup soccer championship match in the Olympic Stadium here between West Germany and the Netherlands.

Mr. Boeiling said that the consultations were "very open and friendly." In Rome yesterday, Mr. Kissinger taiked with Pope Paul VI. The Vatican gave out few details, but it was believed the Pontiff

sounded out Mr. Kissinger's views on how to resolve a Vatican-Is-raeli impasse over the future of Jerusziem.

Chou Hospitalization Report: New Sign of Power Struggle

By Robert S. Elegant

ed is another strong indication that a bitter fight for power is convulsing China's leadership.

Coupled with other evidence the manner of the announcement is a sign that factions in the Communist hierarchy are struggling to seize power that has been relinquished largely by default-by Chairman Man Tas-tung, who is 89 and ailing. Even if temporary, the retreat of Premier Chou, 76, from full activity may stake what little stability still exists among the upper echelons of the Communist party and the gov-

The big question for Chans and the outside world: Can the pow-er struggle be confined to the ranks of the party and the goverument or will it test China into widespread disorder by in-

volving the public?
There already are distarbing signs that the "leftists" are not content with stepping up their verbal assaults on Premier Chou and his "moderate" faction. The and ms "moderate" faction. The extremists are trying to organize an "urban people's militias" which-could fill the violent role that the adolescent Red Guards had during the last big power struggle, the "Cultural Revolution" of 1966-69. U.S. Senator's Visit

Peking's acknowledgement that Mr. Chou was in a hospital was made on Saturday in a dispatch of the official Chinese news agency. The report said that U.S. Sen Henry Jackson, D-Wash, had visited Mr. Chou at his sickbed

in a hospital on Friday.

The senator commented that
the Premier was mentally alert and appeared to be recovering from his recent filness. Mr. Choir cut back his schedule in mid-May, declaring that he was "ill be-cause of old age." He has made no public appearances since the beginning of June. Less than 48 hours before the

news agency's announcement, the Foreign Ministry had issued a flat denial that the Premier was dead or hospitalized, as Peking rumor had reported.

The Foreign Ministry is con-sidered the government unit that is most loyal to Mr. Chou, while the Chinese news agency is thought to be dominated by sup-porters of the leftists.

The Premier obviously decided that his admission to a hospital could no longer be concealed. He-aides, he-clearly wished to see But the news agency's flat rever-sal of a Foreign Ministry denial was highly embarrassing to the moderates. It has undercut Mr. Chou's position—just how badly, no one can yet say.

Mr. Chou's lines has been the key development in Chinese poli-tics in the last several months. the individual who has maintained a consistent internal and ex-

HONG KONG, July 7.—Peking's ternal policy, it also indicates act owledgement, that Premier most strongly that both Premier Chou En iai has been hospitalize. Chou and Chairman Mao could vanish from the political stage

Consternation Seen

China specialists believe that the public announcement of the Premier's hospitalization will cause consternation among his supporters, who may begin seek-ing another leader to follow:

Mr. Chou may have intended

to demonstrate that, despite hospitalization, his condition was not serious. But the Chinese have been made forcibly aware that whatever his condition to-day, the septuagenarian could be haps, dead the following day. Curiously, the new crisis occurs when the moderates have been counterstracking strongly-and

It appeared successfully—against the radicals. Communist party organs editorials on July 1's \$2d anniversary of the party's founding had emphasized one themeunity. The "present struggle," those organs had stated, must be conducted under firm control of the established party structure. The articles demanded obedience to party discipline and national

The centrists publications were responding to increasing leftist beliggrence in local publications and meetings. Recently, the Shanghal monthly Study and Criticism has been more and more strident.

Tactions', Reported

The leftist-controlled organ declared, in the most recent issue to reach Hong Kong: "Within the [regular] party, there are [many] factions. In Peking's terminology, stating the existence of "factions" within the theoretically seamless unity of the Communist party means that those factions are fighting bitterly against each

Study and Criticism also demanded: Expel the representa-tives of the landlord, capitalist class who have wormed their way into the party." Premier Chou is the chief figure in the present hierarchy whose family contained both landlords and capitalists.

The next issue of the leftists' lournal, not yet available in full in Hong Kong, went further in an attack on Wang Ming, a former secretary-general of the Communist party who recently died in exile in Moscow. Wang Ming, the magazine said, had been an architect of the incorrect policy of uniting with the Nationalists against the Japanese in the 1930s. The magazine went on to de-

nounce that policy. Every Chinese knows that Mr. Chou was the chief negotiator of the united front with the Nationalists and was subsequently, the Communists' quasi-diplomatic representking the alists' wartime capital.

Soviet Press Lauds Results Of Nixon-Brezhnev Meeting

By Hedrick Smith

MOSCOW, July 7 (NYT).-The of the Western press had been Soviet press, rebutting some so impressed with the results Western assessments, today that it had shifted from preunderscored what Prayda called the "weighty and constructive results" of President Nixon's talks here with Soviet Communist party leader Leonid Brezhnev.

In the main front-page editorial, Prayda asserted that the complex of agreements signed. here signifies an essential move-ment forward on the path of strengthening peace and mutual trust." It called the summit-meeting "an important new milestone" in Soviet-American relations, ignoring the unresolved deadlock in negotiations on curbing the offensive nuclear arms race and the spread of multiheaded missiles. Privately, Soviet officials and

other Communist party sources avoided such fulsome praise but were relieved that the meeting had come off as well as it did despite the Watergate scandal in Washington and the threat of impeachment against President

These Soviet sources pleased that the regularity of Soviet-American meetings at the highest level has been affirmed. as Pravda noted in its first major commentary on the latest Nixon-Brezhnev meeting.

Collectivity Stressed

"A new meeting is planned next year," said Georgi Ratyant, the chief of Pravda's American department. This shows that such meetings have become an established practice." The editorial also played up the collective nature of some of

talks with Mr. Nixon, At point it ostentationsly listed the participants as Mr. Brezhnev, President Nikolai Podgorny, Premier Alexei Kosygin and Foreign Minister Andrei Gromyko. This is in keeping with some the photographic treatment of the meetings. The front-page pictures in newspapers alternately showed Mr. Brezhnev and Mr. Nixon talking or signing documents, or the four Soviet leaders bidding him fars

well at the troort.
Yesterday, the Central Committee, Gouncil of Ministers and Presidium of the Supreme Soviet issued their customary statement "fully approving" the results of the summit conference.

trust in terms of what you do with the government."

Some of the questions and answers in the Colson interview.

Q-There were an awful lot of

stories in 1971 about Colson the hatchet man, saying he doesn't mind that it gets out that he's

a tough guy, he's going to do

A-Did I mind it? No. The real answer to it, I think, is that

I did not want to see the press...

Allybody in the White House staff

that we, I think we made—any-

body on the White House staff

tomatically be suspect because a

fortiori, you must have been

cultivating the press, and to cul-

tivate the press meant you had

to give them something, and the

whole attitude was don't give

Now, once the hatchet man

story started to develop, there

wasn't anything I could do to turn it off. I mean, I did make

a couple of efforts at turning it

Q-What is the President talk-

ing about when he says in the

White House tapes that Chuck would do anything. What does he mean? Is he saying that in fear of what you know?

A-No. The "Chuck-would-do-anything remark" I heard him

make dozens of times. I had a

very good relationship with him, but he used me in a way that

he found effective, but it didn't

enhance my popularity standing

in the White House. When some-

thing was bogged down, he would always get me into it and say.

"Now Chuck, I don't care"—one

-"break all the China in this

place, I don't give a damn. I'll

back you-up. Just get this done."

And then bravely. I would get it

And he would goad the other members of the staff with that...

transcripts? That is, do you have

information that can impeach

the President? Is there any great

dark secret you know? Any great

single serious crime that should

Q-You've said that before.

A-The answer is no. I con-

sider him a personal friend. He's

a man who has qualities that I

enormously admire. He has

deficiencies like you have and like I have. I think on balance,

he's done a tremendous job as

Q-What about impeachment?

A-If I were a member of Con-

gress I would want to take a look

at every scrap of evidence that's

that it did in fact constitute

bribery, treason, or the high crime

or misdemeanor, then I would want to do a lot of weighing

in my own conscience as to

whether that particular offense

was sufficient grounds to remove

him from office, based upon his

whole record as President and based upon the impact I think

it would have on the country.

Window Smashed in Car in Dallas Motorcade

Sniper Theory Ruled Out in Ford Incident

By William Robbins

DALLAS, July 7 (NYT).-The shattering of a window in a police car that was escorting Vice-President Ford yesterday set off reports that he had been fired upon by a sniper, but this was discounted by officials.

Mr. Ford was on his way from the Dalias-Fort Worth Regional Airport to downtown Dallas to dedicate the New World Trade Center, which is in the same complex of buildings where President John F. Kennedy was going Nov. 22, 1963.

The incident, which resulted in

on the driver's side of the police car, occurred in the suburban town of Irving. The car was the fifth in line behind the bulletproof limousine carrying Mr. Ford. There were no injuries.

Within seconds, scores of local policemen, men from the Texas Department of Public Safety and Secret Service agents converged on the scene. Helicopters supesred overhead and police dogs were

No evidence of a sniper or a bullet was found.

Delivered Speech The 10-car motorcade, which did not stop, proceeded to the dedication on schedule and Mr.

Ehrlichman's Defense Seeks To Back Kissinger Subpoena

during the Elsberg break-in trial Friday that he was informed in August, 1971, that John Ehrlichman and Henry Kissinger, then President Nixon's top domestic and foreign affairs advisers ordered a psychological profile prepared of Daniel Ellsberg

The psychiatrist, Dr. Bernard Malloy, said that a former Kissinger aide, David Young, told him of the directive on Aug. 13, 1973, and that Mr. Young also told him that one of the purposes of the profile would be to use the press against Mr. Ellsberg,

Dr Mallov was one of the first defense witnesses called by attorneys for Mr. Ehrlichman, one of four men on trial on charges of conspiring to commit and cover up the burgiary of Mr. Elisberg's psychiatrist's office. The purpose of the break-in was to gain in-formation for the profile, accord-

Dr. Malloy was called in an apparent attempt to justify a defense subpoens for Mr. Kissinger, now the secretary of state, as a defense witness. They have argued that Mr. Kissinger will deny giving such orders. The defense such a denial will raise doubts as to the credibility of Mr. Young, a key prosecution witness who was first to testify that Mr.

Kissinger was involved. Decision Is Reserved Judge Gerhard Gesell refused again Friday to block the subfor Mr. Kissinger, saying he will reserve that decision until he sees whether Mr. Kissinger is an essential witness in the defense case as it develops, Mr. Kissinger should "hold himself in readiness" as a possible witness

unfil that decision is made, Judge

Gesell said The testimony of the CIA psychiatrist brought Mr. Kissinger's name prominently into the trial for the second time this week. On Wednesday, former White House special counsel Charles Colson testified that President Nixon and Mr. Kissinger had requested him to disseminate derogatory information on Mr. Elisberg, for which Colson has pleaded guilty to obstructing justice in the Pentagon papers trial

of Mr. Elisberg. Judge Gesell also refused Friday to transmit to President Nixon written questions drawn up by Mr Ehrlichman's attorneys. At another point, however, the judge said that any orders from the President blocking a grand jury

WASHINGTON, July 7 (WP) investigation into the Ellsberg

-A CIA psychiatrist testified break-in were "illegal."

The defense had said it intends to call Assistant Attorney General Henry Petersen as a witness to bolster their claims that any concealment of the break-in could be attributed to presidential

Queries Held Too Broad

Defense attorneys, who say Mr. Ehrlichman's attempts to hide the break-in after it occurred were at the President's specific guilty conscience, had agreed to questioning the President in writing. However, Judge Gesell said those questions presented to him yesterday were too broad.

The defense said Mr. Petersen would testify in detail about a previously disclosed conversation with the President, in which the President told Mr. Petersen the break-in was related to national security matters and should not

be investigated. "If those orders were given, those were illegal orders and I will so instruct the jury," Judge Gesell said in response. "There Gesell said in response. is no way a grand jury inquiry can be limited by the President of the United States."

The prosecution rested its case against Mr. Ehrlichman and the three others Friday morning, and Mr. Ehrlichman's defense began in the afternoon.

Mr. Ehrlichman's former White House secretary, Jana Hruska, and assistant Todd Hullin, testified that Mr Ehrlichman worked 13 to 14 hours a day, seven days a week during his years at the White House. Miss Hruska read aloud his appointment records for the month of August 1971, during which he allegedly conspired to break into the office of Mr. Ellsberg's psychiatrist, Dr. Lewis

Schedule Cited

Mr. Hullin, whose father is a former law partner of Mr. Ehrlichman in Seattle, also testified as to the heavy duties Mr Ehrlichman had.

At one point, Judge Gesell interrupted: "Mr. Ehrlichman had a busy, responsible job. There's no dispute about that." President Nixon's former

domestic adviser is charged with making false declarations to the grand jury, each of which carries a possible jail term of five years and fines of \$10,000. He is also charged with lying to FBI agents investigating the break-in, which carries a possible sentence of five years in jail and a \$5,000 fine.

A Secret Service source said that the escape of any possible sniper would have been cut off immediately. "Within one min-ute, there were five law enforcement people on the scene of the field where the trajectory would have had to originate." the source said. "They just smothered the area, as far as the question of any suspect getting away."

A spokesman for the Secret Service, William Hawthorne, said that a search of the area had turned up no evidence of a sniper and that an examination of the broken window by ballistic experts showed that it had not been struck by a bullet. The police car was also searched, but no evidence of a bullet or a stone was uncovered.

"The area was thoroughly searched, but nothing was found," Said Capt. John Driscoll, commander of the Dallas police intelligence division, which assisted in providing security for Mr. There was no place for a shot to come from."

Mr. Hawthorne said that the shattering of the window was officially attributed by the Secret Service to "heat expansion." The temperature at the scene was in the low 90s.

Talking to newsmen after mak ing his speech, Mr. Ford called the report of a shot fired at the motorcade "a wild rumor, an un-

Nixon Calls Him

Mr. Ford said that President Nixon had called him from Key Biscavne, Fig., for assurances that everything was all right.

In a news conference before the dedication speech, Mr. Ford spoke about the impeachment inquiry saying that the chances of an impeachment of the President "have fallen considerably" in the last month and that the case "has fallen flat."

"I have detected a movement in the House that is more favorable to the President," he said "No impeachable offense" has been found with regard to any of the peripheral matters concerning Mr. Nixon, he said, and "the case has not been made" by the House Judiciary Committee connecting Mr. Nixon with a coverup of the Watergate break-in. In his address, Mr. Ford urged Senate action on a House-passed

Baltimore Union Faces Heavy Fine

BALTIMORE. July 7 (AP).— With garbage piling up for the sixth straight day in sweltering heat, a city judge threatened to fine the union of striking city em-ployees \$15,000 a day if they were not back on the job by tomorrow.

Baltimore Supreme Court Judge James Murphy ruled yesterday that the strikers were in contempt of an injunction he issued Tuesordering an end to the strike

The strike by members of the American Federation of State, County and Municipal Employees started last Monday as a wildcat walkout by sanitation workers in a dispute over a new contract. On Tuesday the union sanctioned the strike, which, from then on, included sewer, water, recreation and other city employees as well as the sanitation workers. City estimated about 2,500 workers joined the walkout.

Heavy Demand for Admission

High Court Hears Nixon Case Today

By Warren Weaver Jr.

المكندا من الأصل

WASHINGTON, July 7 (NYT).-The hottest ticket in Washington will not get you into the local sports arena, the Kenned: Center Opera House, the Wolf Trap Outdoor Performing Arts Center or the private White House tour.

It is a small cardboard oblong ncaded "Special-Supreme Court of the United States' that admits the bearer tomorrow to one of the most historically and politically significant sessions that stices have held in years. Or so the public seems to think. Ever since the court announced

on May 31 that it would hear oral arguments on July 8 on the disnute between President Nixon and Leon Jaworski, the special Watergate prosecutor, over 64 White House tape recordings, public and professional pressure for seats has been intense. Ordinarily, there are about 250

seats in the courtroom, but 70 or so temporary chairs are being added in the two aisles that flank the chamber. Despite political and celebrity pressure, more than a third of the total will go to the general public.

About 100 seats will be open to the general public, filled on a first-come, first-served basis. The doors will open at 9 a.m. But court officials expressed doubt that anyone arriving after 8 o'clock would get a seat.

be reserved for the public on a rotating basis, with a new set of spectators replacing an old one every five minutes.

The next largest representation will be from the press, which usually rates 35 seats and has been allocated about 70. There will be no television, no radio and no still photography, as traditional in the courtroom, but a half-dozen artists have been admitted for television purposes.

Barrett McGurn, the court public information officer, said that more than 100 requests for seats had been received from news media representatives. Some of the assignments only permit a reporter to occupy his seat for half the argument, which is expected to last from 2 1 2 to 3

Allocation Breakdows

Mr. McGurn declined to provide a precise breakdown of the remaining seat allocations, apparently for fear of offending rejected applicants, but it appeared that the 120 spaces not occupied by the press and public would go roughly along these lines:

Justices, for their personal friends or family, 27; law clerks, both those closing out their service and those reporting for the 1974-75 term, 40; members of Congress, 25; lawyers who are members of the Supreme Court Bar drawn in a lottery, 25, and

Twenty-seven other places will lawyers on the White House and e reserved for the public on a special prosecutor's staffs, 6.

The last figure does not include the lawyers who will argue the cases—James St. Clair for the President and Mr. Jaworski each of whom will probably have two assistants.

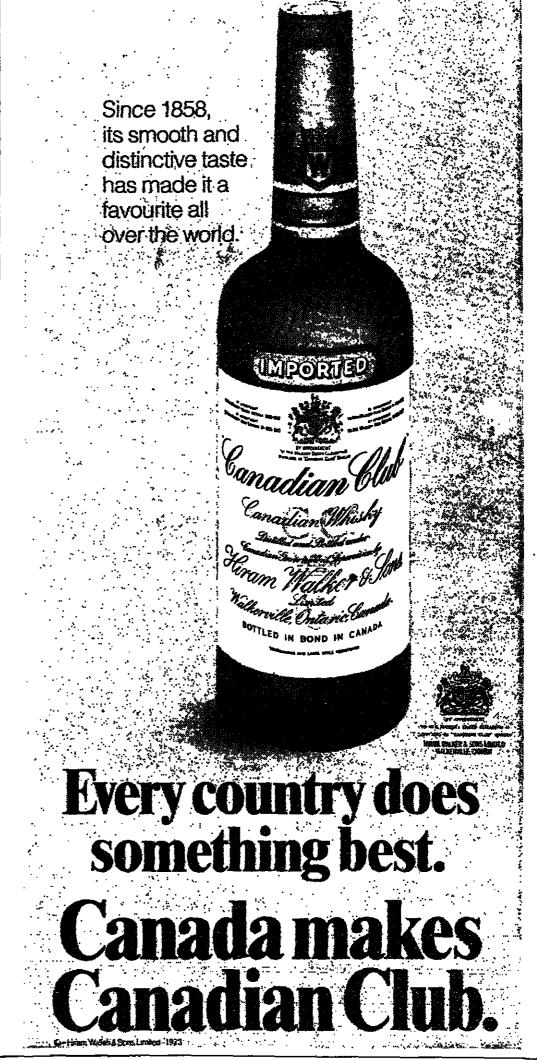

Pressure for a seat in the courtroom has mounted even more during the last 10 days, with the increasing possibility that the court will hand down its decision in the Detroit school desegregation case tomorrow, just before the Watergate oral arguments.

A seat will almost certainly remain empty throughout the arguments. however. Associate Justice William Rehnquist has disqualified himself from hearing the case, apparently because he served in the Justice Department under John Mitchel, a defendant in the Watergate cover-up trial for which the tape recordings are

CIA Ended Mexico Cover After Angry Agent Quit

ments '

By Laurence Stern

WASHINGTON, July 7 (WP) -A veteran Central Intelligence Agency covert agent, who resigned in 1969 to protest U.S. policies in Latin America, figured centrally in the closing of a Mexico City CIA "cover" office operated by a Wasnington-based public relations firm, Robert R. Mullen & Co.

The former agent, Philip Agee, was the unidentified subject of a cryptic reference to a "WH flap" in a recently released Watergate report of Sen. Howard Baker,

Mr. Agee served in the Western Hemisphere "WH" Division of the CIA's clandestine services in Ecuador, Uruguay and Mexico from 1960 to 1969, when he resigned from the agency, according to informed nongovernmental

Since leaving the CIA, it was further learned, Mr. Agee, who is living abroad, made several trips to Cuba where according to an acquaintance, he was engaged in

Macdonaldrilluis

MITTELERS & TETTH -SCOTLA

An earlier published report that a former CIA official—now known to be a reference to Mr. Ageehad passed information to Soviet intelligence officials, was termed "nonsense" later by informed

The CIA ended the previously undisclosed Mullen Co, cover in Mexico City after becoming fearful that Mr. Agee might publicly reveal its secret intelligence role.

Sen, Baker for months has been pursuing the possibility of CIA involvement in the Watergate scandal. President Nixon justified the intervention of top White House aides in the July, 1972, FBI investigation of Nixon re-election fund "laundering" through Mexico on grounds that an FBI probe might expose covert CIA activi-

CIA Director William Colby, in written response to Sen. Baker's report last week, said that Western Hemisphere flap had no relationship to Water-

Former CIA director Richard Helms and his deputy, Gen. Vernon Walters, repeatedly asserted to White House officials and to then acting FBI Director Patrick Gray 3d that the FBI investigation of Watergate money laundered through Mexico would not expose covert CIA activities.

Mr. Colby's comments last week reaffirmed the Helms position of last year. But Sen. Baker persisted last week in keeping the question open and said that the agency's explanation of the Mullen-CIA incident "is clouded by conflicting evidence."

The former agent is understood to be a source of concern to U.S. officials because of his knowledge of CIA activities in

An acquaintance in the United States with whom Mr. Agee has corresponding said the former CIA officer acknowledged that he had functioned as an undercover agent in the American Institute for Free Labor Development (AIFLD), an aifilinte of the AFL-CIO AIFLD has conducted extensive programs with Latin American labor or-

Police Force

Mr Agee wrote his American correspondent recently that he now regards the CIA as a "police force" which in his view assists in imposing U.S. "economic exploitation" in Latin American

"He's obviously become quite radicalized," said Mr. Agee's correspondent, who has also been associated with intelligence activities. "But this guy was an operative for 14 years and he knows names and places. There are people in Washington who are scared-of this guy.

Mr. Agee is understood to have entered into negotiations with a foreign publisher on a book Mr. Bennett and the Mullen

Co. have figured in a series of relationships not only to the CIA but also the Nixon re-election campaign During 1971, Mr. Bennett drew

up the names of dummy committees set up to funnel secretly more than \$300,000 in contributions from the milk producers to the Nixon re-election campaien. The Mullen Co. was also identified as the source of blank checks transmitted from billionaire Howard Hughes's interests to the Committee to Re-Elect the President during the 1972 cam-

By Cover-Up

By George Lardner Jr. WASHINGTON, July 7 (WP). — Special prosecutor Leon Jaworski charged Friday that

the Watergate cover-up was designed to conceal a broad range of "illegal and improper activities," including the wiretapping of newsmen and administration officials. Mr. Jaworski said there were

at least seven projects in addition to the bugging of Democratic National Committee headquarters that the conspirators were trying to hide in blocking the original investigation of the

particulars that he filed Friday with Judge John Sirica, Mr. Jaworski said the secrets that prompted the conspiracy

◆ The Ellsberg burglary, for which former White House adviser John Ehrlichman is now standing trial on conspiracy

charges. • The fabrication of cables dealing with "the relationship between the governments of the United States and South Viet-nam' during the Kennedy ad-

· Political espionage, intelligence gathering and during the 1972 presidential campaign.

• Violations of campaign-financing laws.

"unlawful entrees and in electronic and other unlawful forms of surveillance."

• Electronic surveillance newsmen and government officials.

In listing these activities, Mr. Jaworski appeared to be laying the groundwork for a prolonged trial that could touch on virtually every alleged misdeed that has been traced to the White House since the June 17, 1972, Watergate break-in.

The six defendants in the cover-up case are White House ides H.R. Haldeman, Gordon Strachen and Mr. Ehrlichman: former Attorney General John Mitchell, former Assistant Attorney General Robert Mardian and Kenneth Parkinson, an attorney for the Committee for the Re-Election of the President.

Other Crimes Minority Regime Seen Likely Seen Hidden In Canadian Election Today

OTTAWA, July 7 (NYT) .- Canadian election forecasters see a strong possibility that another minority government will emerge from the national election for Parliament tomorrow, whether the vote favors Prime Minister Pierre Elliott Trudeau of the Liberal party or his principal rival Robert Stanfield, the leader of the Progressive Conservative par-

Minority governments have come out of five of the last seven elections, leaving the Prime Minister to depend on the support of one or more minor parties. The result has been unwelcome insecurity at the top.

Mr. Trudeau's government fell two months ago, when the Liberals lost the support of the New Democratic party, a Socialist group, on budgetary issues.

According to surveys across the country, many voters were no more eager than Mr. Trudesu to have onother election less than two years after the last one and are hoping that the next government, whatever it is, will have the majority necessary to remain in power the customary four years. This would require one party to take 133 of the 264 seats in the

In the 1972 election. Mr. Trudeau's Liberals won 109 seats to 106 for Mr. Stanfield's Progres-Conservatives. The New Democrats held the balance of power, with 31 seats, and smaller parties had the rest.

Under the Canadian system the prime minister is the leader of the victorious party. However, the surveys show that many of the 13.5 million eligible voters will really be selecting Mr. Trudeau or Mr. Stanfield, sometimes at the expense of local candidates whom the same voters would like to see in Parliament.

The prediction of a minority government reflects the diversity of local interests and loyalties that make it difficult for one party to prevail. A party that usually does well in one section may fall consistently in another for reasons inherent in the national character.

According to the latest Gallup poll. published a week before election day, the Liberals were

Security Council: fewer than a dozen members of the Atomic goergy Commission - even they didn't think the President would reach agreements with Egypt and Israel before he returned from his 10-day tour.

The secret was so well kept that it took Congress almost completely by surprise. One report has it that on the day before President Nixon left. Sen. Henry Jackson, D-Wash, asked Secretary of State Henry Kissinger if there were any surprises in the offerings to Egypt and Israel Mr. Kissinger is reported to have said there were none, presumably because he did not think the puclear power agreements would be

The secrecy of the agreements appears to be matched by the

Hawks Called Détente Bar By Fulbright

Sen. William Pulbright said today that "hawks" in Congress and the U.S. military have undermined President Nixon's ability to negotiate peace with the Rus-

Describing a nation "in great disarray," the outgoing chairman of the Foreign Relations Committee said Congress is now dominated by pro-military forces led by Sen. Henry Jackson, D-Wash. Sen, Fulbright, D-Ark., was asked if he thought the Russians had teken advantage of Mr. Nixon's nomestic political weakness in or-

der to avoid any new commitment to strategic arms limitation." "I rather think that his weakness is exploited more by our own, what we call hawks. I mean the military and some of the leaders in Congress, than it is by the

Russians," Sen. Fulbright said. Undermined by Congress ". It's the Congress that has undermined the whole idea of

He was interviewed on NBC's "Mect the Press' television pro-Now, coming down to the plant for them. present, it's my distinct impres-sion, as I interpret what I read

and hear, that our own military is one of the principal obstacles to putting forward agreements on strategic arms which are reasonable and acceptable," he said. Our own military is the prin-

cipal obstacle, I think, in the way of our making reasonable

Sen. Fulbright, who lost his bid for re-election in the recent Arkansas Democratic primary, conceded he has been kesing battles in the Senate to Sen. Jackson and other proponents of lough dealing with the Russians. Not Representative

"I don't think the Congress at the moment is really representatite of the mood of the country.' he said. "I believe people in this country support detente, but it is not effective in the Congress, ...

"The organizational support centered around Sen. Jackson and the Military Affairs Committee and Mr. George Meany [president of the AFL-CIOI is so powerful that we have not won any of the contests, on defense and foreign

Sen. Pulbright also said Henry Kissinger was "the best equipped and most able" secretary of state of his time, and he suggested that Mr. Kissinger would come through the impending hearings on his role in White House wiretapping unscathed.

Tories, Liberals Force Election in Fall, Healey Says

LONDON. July 7 (Reuters).— Chancellor of the Exchequer Denis Healey said yesterday the Labor guternment will be forced to hold R' general election this Eutumn betause it can no longer govern.

In a radio interview, he said the opposition Conservatives and Liberuls had acted capriciously and irresponsibly by inflicting a series of parliamentary defeats on the government, making a stable ad-

ministration impossible. They produced a situation in which the government simply cannot govern so we are being forced to hold a general election as soon as the holidays are over and prople are at home and able to Fore," he said.

Mr. Hesley said that for the first three months after the last elections on Feb. 28; the Conservatives had been frightened to voic against the government because they did not want to force a June election. But once this danger was over he said, both the Conservatives and the Liberals changed tactics and initiated the series of parliamentary dericals for Labor.

Will-on had not told him if a another fail sentence, the pension oute for the elections had been

A few days after the Middle the Atomic Energy Commission for 578 million worth of enriched uranium. Both countries made down payments with checks drawn on New York's Morgan Trust Co., Egypt for \$660,000 and

The official explanation for this speed was that the fuel contracts had to be signed before June 30, a deadline for all new uranium contracts that the AEC insists is set by law. The law states that the AEC is not permitted to sign uranium fuel contracts beyond its stated capacity to enrich the fuel, a capacity that has now been

"It bothers me that we were. in such a hurry to get those con-tracts signed," said a highly placed source in the Nixon administration. "It makes it look as if the deals are being railroaded

through Congress." What bothers some in the Nixon administration is that the White House took it on its own to reach the agreements in the first place, without exhaustive consultation with Congress and the AEC, where civilian control nuclear energy is supposed

"The philosophy of AEC control of nuclear energy was aban-doned with the Middle East spreements," said-a Nixon administration source. "Nuclear energy was used by the White House as an instrument of diplomacy and politics."

Congress Moves

Congress has been quick to move on the Middle East nuclear pacts. The House Foreign Aifairs Committee has already besun hearings on the agreements. while the Senate Foreign Relations Committee is preparing theirs. Sixteen members of the Joint Committee on Atomic Energy signed a proposed amendment to the Atomic Energy Act giving Congress veto power over such agreements.

While the nuclear pacts with Egypt and Israel look hasty on the surface, the White House says in its defense, they have been under discussion for some

Egypt, indeed, has been asking the United States for a nuclear power plant since 1970, just after Egyptian leader Gamai Abdel Nasser died. Every four or five months for the last four years, Egypt and Libra came to elther Westinghouse Electric Corp. or General Electric Co. and asked them to build a nuclear

"We always gave them the same answer," said a spokesman for Westinghouse, "Go to the AEC and get an agreement for

cooperation." Ex-Im Bank Loan

Sometime this year, Egypt did just that. The exact date is not certain, but it was in either March or April First, Egypt applied to the Export-Import Bank for a loan to finance construction of a nuclear plant. Theu it came to the AEC with Ex-Im Bank backing and formally asked for an agreement of coopera-

The word was out around Washington that Egypt was serious about wanting a nuclear power plant. The Arms Control and Disarmament Agency and the State Department together hegan a study of the feasibility of such a plant and the safeguards it might require.

The way the White House agreement reads now, Egypt would get its nuclear power plant about 1982. The plant would generate 600,000 kilowatts of electricity and cost about \$300 million. The plant offered Israel would be a little larger and cost a little more.

One argument in favor of nuclear power for both Egypt and Irrael is that both countries need it to desalt their water as well as for electricity. There is little question the Middle East is chronically short of fresh water, but there is a continuing argument whether nuclear power is the best way to

The real reason the United States is selling nuclear power to Egypt and Israel is simply a wish to beat France and West Germany. Both countries were negotiating with Egypt and Is-rael-Prance with the Egyptians and West Germany with the Israelis. Make no mistake about it. said a source close to the AEC if we hadn't sold Egypt and Israel nuclear power. Prance and West Germany would."

Grigorenko Gets Reduced Pension

The Difficult Debate

Dr. Kissinger believes, and with reason, that it is of great importance for the world that the issue of nuclear arms limitation be subjected to informed public debate in the United States. The resolution of the issue means much for life on this planet; the present practical parity could be temporary, and, in any case, leaves tensions persisting between the military establishments of the Soviet Union and the United States, and positively enhances those outside the borders of the superpowers. The economic burdens of competition in arms are heavy, and divert resources urgently needed to meet the many problems posed by impending and existing shortages of food, raw materials and energy.

Yet the debate will be difficult—the most complex of all the "great debates" which have engaged public attention in the United States on subjects relating to foreign affairs since World War II began casting shadows ahead of itself in the 1930s.

For one thing, the central theme deals with matters of the highest technological obscurity: the performance of a variety of highly sophisticated weapons, and the best method of striking an international balance among them. Even assuming that there is no concealment, for security reasons, of the known facts about such weapons, there is ample room for dispute among the experts; for the public, it will become largely a question of the credibility of the experts themselves.

If, for example, the secretary of state says one formula for military balance is satisfactory, with only an acceptable degree of risk, while the secretary of defense holds the risk is unacceptable, whom is the nation to believe? If Mr. Nixon had the full confidence of the people, doubtless his choice would settle the matter; that is simply not the case at present.

Then, of course, there is the matter of how the respective intentions of the Soviet Union and the United States are judged, by the allies and enemies of both. No decision that is reached by Moscow and Washington can fail to take this factor, with all it means for peace in Europe, the Middle East, Asia and the Americas, into account.

Finally. America would be debating this question in full publicity, appraising the interests of individuals, parties and nations openly. The same is certainly not true of the Soviet Union, where internal conflicts and agreements are, at best, seen as through a glass, darkly.

Nevertheless, the debate must take place, and as openly as the nature of the case permits. Nuclear war came upon the world from the deep secrecy of the Manhattan project. Its meaning was discussed, with a reasonable degree of openness, when the United Nations sought to act upon the Baruch plan, and, when that was vetned by the U.S.S.R., lapsed back into the gloom of the cold war. The "missile gap" controversy became a political football, kicked about with a fine ignorance-or disregardof fact. The question now is: Can the present climate of world affairs permit a rational argument over a critical item of national defense?

There are still enough old cold warriors. and enough who refuse to believe that aught good can come out of Richard Nixon to make the nature of the debate debatable. But the possibility must be tested, whatever other matters may seem to engage the public attention. For a hope has been held out in the Moscow meetings that is too significant to be allowed to lapse by default.

New Try in Ulster

The deteriorating situation in Northern Ireland clearly demanded a fresh initiative from the British government. While it is difficult to muster much optimism about Britain's new proposal for Ulster, it offers at least as much hope for advancing a solution to the problem as any of the alternatives suggested so far from any other

Former Prime Minister Heath fears that the proposal for election of a 78-member constitutional convention in Ulster will "sweep away everything" his government had worked out for the sharing of political power between the province's Protestant and Catholic communities. In fact, however, the powersharing machinery was swept away when the 15-member Northern Ireland Executive collapsed in late May from pressures generated by a crippling strike led by Protestant extremist organizations.

Members of the convention will be elected under the proportional representation system used a year ago to elect a now-suspended Northern Ireland Assembly, thus insuring fair representation for Ulster's Catholic minority. But having decided to play no part in the convention, Britain can only insist that any draft constitution drawn up must provide for "some form of sharing of

power and partnership," as the official announcement says.

Yet the official Unionist party, which claims with some justification to represent the largest body of Ulster Protestants, has ruled out in advance any sharing of power with the Social Democratic and Labor party, the main spokesman for the province's 500 .-000 Catholics. The Unionists also reject the British requirement of an "Irish dimension," meaning some formal links, however modest they may be at the beginning. between a future Northern Ireland administration and the Republic of Ireland.

Thus, as Mr. Heath says, the recommendations of a constitutional convention dominated by the Unionists are likely to be unacceptable to the British Parliament, which must finally approve them. Britain's secretary for Northern Ireland, Merlyn Rees. hopes that the Unionists will moderate their positions and that the delegates to the convention will "talk together as Northern Irishmen" in an effort to find a way to stability and peace.

Unfortunately there is no evidence to suzgest that the representatives of the two communities-let alone the terrorist groups at the two extremes-will find a better path to cooperation on their own than they have up to now under British auspices.

Dacca Summit

Nition's visit to the Soviet Union, the summit meeting in Dacca between Prime Minister Zulfikar Ali Bhutto of Pakistan and Sheikh Mujiour Rahman of Bangladesh was a dramatic event that could have important long-run consequences for the 150 million people of their two countries and for the entire Indian subcontinent. Initial results of the meeting were disappointing. It is unfortunate that no apparent progress was made toward solving problems left over from the Bangladesh war of independence two and one-half years ago, such as the division of assets and liabilities, the fate of some 400,000 non-Bengali Muslims left stranded

Although overshadowed by President in Bangladesh, the establishment of diplomatic relations and resumption of trade.

> Nevertheless, the warmth of the reception accorded to Mr. Bhutto in Dacca, the frankness of his apology for Pakistan's "shameful repression and unspeakable crimes" in the former province, denote an exemplary readiness to forgive and forget. If this new spirit can be fostered through an early return visit of Sheikh Mujibur to Pakistan, which has already been accepted in principle by both sides, there is every reason to hope that their remaining differences can be resolved.

International Opinion

Paying for Détente

Understandings between big powers are undoubtedly important and legitimate matters when aimed at preventing conflicts and reducing confrontations. But is it admissible for Nixon and Kissinger to entail complicity with totalitarianism? Do they really mean that demands based on human rights must be pushed into the background, hushed up, forgotten or allocated to the sphere of the other side's "domestic concerns"?

And is American policy telling America's

alone until she has pushed detente, with its concomitants of strategic horse-deals and economic aid, to a point where it becomes firreversible" after which everything will work out by itself? If so, it would be interesting to know what provides confidence that totalitarianism will prove a reliable partner along this road, and that other things will fall into place automatically once détente has been achieved.

-From the Neue Zurcher Zeitung (Zurich).

In the International Edition

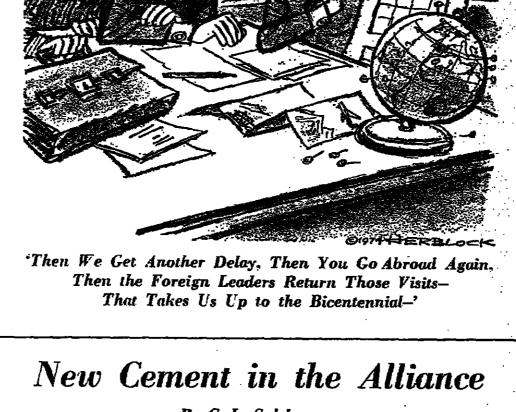

Seventy-Five Years Ago

July 8, 1899

PARIS-The Rennes correspondent of Le Temps telegraphs that, in consequence of the time required by the government commissioner. Inc president of the court-martial and the defense to examine the dossier, it will be impossible for the trial of Capt. Dreylus to begin before August 10. The country still remains deeply divided over the outcome of

Fifty Years Ago

July 8, 1924 LONDON-The Labor government has decided against the construction of the English Chan nel tunnel. The defmite announcement that the government had accepted the recommendation of the Imperial Defence Committee, which is adverse to the project, was made by Prince Minister Ramsay McDonald in the House of Commons today. There is still a great amount of controversy on this subject.

By C. L. Sulzberger

DARIS-The purpose of the new strategic doctrine developed by U.S. Defense Secretary Schlesinger during the past year is to tie the United States more closely to its NATO partners in Western Europe's defense. This was acknowledged in the 25th-pirthday communique issued at Brussels June 26 when the alliance pledged itself to resist any attack with "ali" forces at its disposal. The word "all" refers to nuclear

This is a matter of primore al importance to Europeans who have increasingly doubted the Americans' will to use atomic arms when fulfilling NATO obligations--unless U.S. territory or an automatic risk of nuclear doubts, often expressed by Gen. de Gaulle, were shared by many non-French leaders.

Thus, on July 26, 1962, Franz-

defense minister, told me he was enormously worried by President Kennedy's appointment of Gen. Maxwell Taylor as chairman of the U.S. Joint Chiefs of Scatf. Previously, while in retirement, Taylor had written a book, "Certain Trumpet," in which he indicated the only basic excuse for American employment of nuclear weapons should be national survival of the United States.

Increased

"You can imagine how we feel about that," said Strauss. "We can never allow an aggressor to think he might try a military probing action without assuming made to fear a nuclear risk of retaliation directly on the Sovict Union should they move in Germany.

These doubts increased mani-

Elegant Alternative

By William F. Buckley Jr.

John Rhodes of Arizona is quoted as saying that the censure of President Nixon would be the "worst of two worlds" and liberal Democrats are echoing that sentiment with such fervor as to betray the fact that it has become a real political possibility. I confess that I am surprised by Mr. Rhodes's position. But then he is, after all, the Repub-iican floor leader in the House of Representatives, Perhaps, as such, he is taking the position that there shall be nothing on the record critical of President Nixon, thus performing the function of the football coach who, at half time, decisims to his team that the fact that they are behind 26-0 has no bearing whatever on their prospective victory. Mr. Rhodes should be saying more interesting things than that; and perhaps he is, privately. Because, as I say, the bitter-

enders, who wake up in the morning and dream of meeting Richard Nixon at Appomatox, are having nothing of it, Mr. Tom Wicker is so exercised at the thought of merely censuring Nixon that he is driven to historical solecisms. "For Mr. Nixon,"-Mr. Wicker writes-"censure might be acceptable if he wanted nothing more than to cling to office—as sometimes seems to be his goal; but it could hardly be a satisfactory outcome for a man who has steadfastly protested his innocence of wrongdoing, and whose penchant for 'firsts' could hardly include 'first President to be censured'."

It is more accurately said that Mr. Wicker is apparently the last public commentator in America to discover that another Amerlean president was indeed censured. It was Andrew Jackson, in 1834, and on the assumption that there might be a few Wickers around, I devoted two columns to the subject a year ago. At that time, there was much fulmingtion against Richard Nixon not only on account of Watergate, but on account of the bombing of Cambodia, which the Senate was about to forbid him to do. For a while, Mr. Nixon took the position that he had the inherent power to bomb Cambodia: but the constitutional question became lost in the shadows of the testimony of John Dean.

Andrew Jackson was censured on March 23, 1834, by a vote of ment,

NEW YORK - Congressman 26 to 20, on a motion of Henry Clay. Clay was saying about Andrew Jackson exactly the same kind of thing Wicker et al are saying about Richard Nixon, and by the way they are (in the opinion of this conservative, both

> Clay, reacting furiously against Jackson's at withdrawing of U.S. government money from the Bank of the United States, and b) firing the Secretary of the Treasury who declined to follow his instructions, uttered the following words: "The eyes and the hopes of the American people are anxiously turned to Congress, They feel that they have been deceived and insulted: their confidence abused: their interests betrayed; and their libertles in danger. They see a rapid and alarming concentration of all power in one man's hands. They see that, by the exercise of the positive authority of the executive, and his negative power exerted over Congress, the will of one man alone prevails and governs the public.

> > The Broadcast

Now Nixon's insistence, as of his famous broadcast of April 30, 1973, wherein he asserted his total innocence must be examined in the light of what then happened—and Mr. Wicker knows this Obviously Mr. Nixon did not sufficiently supervise the activitles of his subordinates. And, Andrew Jackson, replying to Henry Clay, vindicated Jackson's firing of the Secretary of the Treasury in words that superbly frame the existing impasse. " . . It was for the sole purpose of causing all executive officers, from the highest to the lowest, faithfully to perform the services required of them by law that the people of the United States have made (the President) their chief magistrate and the Constitution has clothed him with the entire executive power of the government."

In other words, not only is there a precedent for censuring a president. The facts surrounding that censure are dramatically relevant. True, three years later, the Senate voted to expunge the vote of censure; but that is neither here nor there. We do not know what history will be saying about Mr. Nixon three years from now, let alone 103 years from now. But censure remains, right now, the elegant alternative to impeachfold in subsequent years. There was alarm in Europe over the strategic doctrine of Kenneav's defense secretary, Robert S. Mc-Namara, which argued that the only assurance of safety in a nuclear-missile age dominated by two superpowers was the threat of their "mutual assured destruction," or MAD, as it was known under a suitable acronym.

Although NATO experts argued like medieval theologians about "flexible response" and a stra-tegic "pause" before nuclear weapons could be used in war, MADness remained the core, No one could be mad enough to fight in the atomic age, it was reasoned -forgetting Adolf Hitler.

During the past decade the Russians have greatly increased. their atomic weapons arsenal. leading the U.S. government to embrace a new doctrine of "sufficiency" rather than superfority. At the same time, the determination of the Nixon administration to negotiate a meaningful detente with the Soviet Union led some European NATO partners to a mood of skeptical depression.

Proxy Wars

They suspected the superpowers were in effect asserting a condominium on this continent which might approximate that unessily established in the Middle Cast, There, America and Russia armed their clients to fight proxy wars but carefully avoided being drawn into such conflicts themselves.

The last thing the NATO partners could accept would be the idea of a proxy war-a concept which, in fact, has never been contemplated for an instant by Washington but which has been attributed to us by suspicious allies. To crase these suspicions Schlesinger changed our strategie doctrine while stressing the need to maintain a reasonable military balance on NATO's central front, despite continuing détente negotiations.

He sought to tie N.S. nuclear power directly into U.S. alliance obligations by introducing among NATO choices for ripoete to major attack the possibility of a relatively small, limited missile strike against Soviet military Thus we have again targets. stressed the original philosophy of NATO by reaffirming the intention of totally defending not only ourselves but our allies.

This new targeting doctrine is only to be applied in case of a "massive invasion of Western Europe." It is not that terrible bugaboo of our age, a plan for a "first strike" against an enemy or a blueprint for a "limited war, which is well nigh impossible. It is simply a logical option for defense, in case of attack. It is designed to hold the alliance together more effectively to deter a conflict that will never be fought if proper deterrence exists. Schlesinger calls this a formula for "selective retalistion." designed to reduce the threat of holocaust by mistake.

Since both Washington and Moscow are obviously in equiest about continuing arms control negotiations, realfirmed validity of our principal alliance increases the U.S. bargaining leverage. Peace has obviously become an imperative in a world which McNamara rightly discerned as "MAD." Yet Americans should remember a phrase from George Washington's speech to Congress (Jan. 8, 1790): "To be prepared

for war is one of the most effec-

tual means of preserving peace,

u. The New York Times.

'Conceptual Breakthrough'

How to MIRV a Cow

By James Reston

of the oil crisis, Americans complained that the nations of the Middle East monopolized the world's oil reserves and created great hardship by charging the highest prices possible.

Now, with less publicity, the world is facing a food crisis, and the main question this time is what the United States and Canada will do about it. For North America now controls a larger share of the world's exportable supplies of food grains than the Middle East does of oil.

The analogy, of course, is not precise, because the United States is not withholding grain from nations for political purposes, but the price of wheat, soybeans and corn has more than dotabled in the last 20 months, and the nations that need food the most are precisely those least able to

Moral Question

This raises some hard political and even moral questions—as Lester Brown of the Overseas Development Council put it to the Rocketeller Commission on Critical Choices for Americans: Can we rely primarily on the marketplace to set the price and deter-mine the distribution of so ssential a commodity as food? And should Americans continue to consume as much fodder as they now do, most of us consuming more than we actually

There is little doubt," Brown told the Rockefeller Commission, "but that a year from now we will see the largest food deficit of any region in history unfolding in Asia—a situation where political leaders in the more affluent countries, including the United States, may have to decide whether to throw up our hands and sort of cast Asia adrift ... or go to consumers and ask the food equivalent of turning the thermostat down six degreesthat is, reducing consumption of say, livestock products in order to free up many millions of tons of grain to move into Asia."

27-Day Reserve

World demand for food because of rising population and marginal improvement of living standards some countries is increasing by 30 million tons a year. In 1961, we had reserves amounting to days of world food consumption Now, despite very good crops in the major grain pro-ducing countries last year, re-serves are down to 27 days and declining by 10 million tons a

U.S. farmers and the Department of Azriculture have probably made as great a contribution to world peace as the soldiers at the Pentagon or the diplomats at the State Department, Nobody can say they didn't do their part. increased corn production by

NEW YORK - During the worst. 4 per cent per acre. So great of the oil crisis, Americans has been the demand for soybeans that one acre out of six under cultivation in the United States is now planted in that crop, and U.S. soybean exports now bring

in more money than all our high technology exports such as computers or jet aircraft.
Meanwhile, enormous progress has been made in increasing the production of poultry, eggs, and milk. Brown notes that the average milk production of a cow in India today is about 600 pounds

a year. In the United States, the average is 10,000 pounds a year. This, however, does not satisfy the Department of Agriculture experts. They want to know why a cow in the state of Washington produced 44,000 pounds of milk last year, and why the average American hen, even when tricked by controlled lighting, produces only 232 eggs a year, while the Japanese actually induced one hen

to lay 365.~ It is a particular disappoint-ment in Washington that the scientists have not been able to produce multiple births in cattle. This is really, to use Henry Ris-singer's term, the "conceptual breakthrough" that the agricultural scientists are looking for. They would rather MIRV a cow than a missile, but so far they haven't managed to do it, and supply keeps running behind demand.

Other Reasons

There are other reasons. The United States is running out of idle acres. Fertilizer is in short supply because of the rising price of oil and the increased demand. While the average person in poor countries consumes about 400 pounds of grain a year, the average North American is now consuming nearly a ton of grain a year, about 100 pounds of it in the form of beer and whiskey. Also, while we are now putting much marginal land back into production in the United States, we are also taking out of pro-

duction about a million good acres a year for highways, shop-ping centers, and golf courses. It is true, of course, that the Malthusians had been predicting disaster in this race between people and food for a very long time, but the sarplus of people and the shortages of water, land, energy, and common sense are beginning to catch up with us

The guess here is that the United States could make more friends and progress in the world by solvingsthe food crisis than by fidding with the missile crisis. But this will take some doing.

The rich world doesn't really believe in the coming food crisis any more than it believes in the we'll all be weight watchers including Henry Klasinger, but not until the crisis is really much

American Indians Writing as an American, I have

this to say. Whenever the subject of Soviet Jewry persecution and cruel re-pression of dissidents in Russia comes up for discussion as abhorrent and highly immoral. Mr. Nixon does nothing but merely expresses his refusal to interfere with the internal affairs of other

nations. Seemingly Mr. Nixon is doing nothing either about dreadful conditions in the United States. refer in particular to the awful plight and poverty of the American Indians

Sympathizers with the American Indians please note that we intend to do all we can for these true Americans in our Internaional Anti-Poverty Program:

Dr. SHEILA WATERS. Easthourne, Sussex. .

Détente?

In his recent column on Henry Jackson (IHT, June 29), James Reston comes very close to ridiculing the senator's suspicions regarding detente. Here, little more than 10 miles from the beginning of the Soviet world where, on the other side of the barbed wire fence near Mogelsdorf, peasants work their fields under armed guard, one is not reassured by the suggestion (reminiscent of "The Emperor's New Clothes") that the minds of se who mistrust detente are not subtle enough to appreciate

One is compelled, rather to take a more empirical tack, and weigh the available evidence as carefully as possible. Perhaps the best evidence for evaluating the proposition that detente has been real and not illusory is the

behavior of the Soviets during the October war. Surely, any change in the Soviet posture, any increased inclination towards "negotiation rather than confrontation" should be most easily discernible there. Of course, no such change was

evident. Soviet behavior was as actively belligerent as it had been in any of the Middle East conflicts of the pre-détente era, Clearly, the burden of proof emains upon the proponents of detente. They should think twice before scoffing at those who

have doubts about it. SAM HAMBURG.

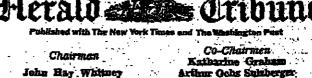

Burgenland, Austria.

U.S. Nuclear Reactors Sorry, Mr. Sulzberger-the military implications of American power reactors in the Middle East are far from ridiculous CIRT, July 1). When it comes to producing plutonium the main dif-terence between research reactors and power reactors is that power reactors produce more plutonium faster: upwards of 200 kilograms a year from a 1-billion-wast lightwater reactor, enough for at least

See for instance the Ford Foundation Energy Policy Project study "Nuclear Theft: Risks and Safeguards," by Mason Wilhich and Ted Taylor, and please, be-fore you comment further, be sure you really understand just what is implied not only by the "inadequate" safeguards on Canadian reactors, or the non-existent safeguards on French ones, but also by the dispensation safeguards are at best a piousand desparate none.

e Venice keeps crimbling and ing into its lagoon.

ASHINGTON (WP). - Pesinger's secret Peking trip in

It is also relevant that China and the United States supported Pakistan in the December, 1971, war with India over Bangladesh, while the Indians enjoyed Soviet support. The United States has a virtual alliance with Iran a country with which the Chinese also have warm relations. In this sense Washington and Pe-king have been developing for some time now a community of interests in South Asia and the Gulf area.

As understood by diplomats here, Mr. Chou indicated to the

Pakistanis that China is less concerned over a direct Soviet atnuclear or conventional, than it may have been some years ago. Mr. Chou, it is said, believes that the presence of one million or so Soviet troops on the Chinese border does not appear to constitute an imminent threat; it would be a different matter if for example, the Russians massed three million men there. Nevertheless he suggest-ed, China is not taking any chances and maintains strict vigilance along its frontier. The shifting Chinese perception

of Soviet moves is that Moscow has now set its course firmly on a political strategy in South Asia and the Persian Guif, both outflank China from the south and to establish its presence and influence conclusiveon the eastern approaches to the gulf Simplified and paraphrased, this is how Mr. Chou is said to regard the situation:

• Mr. Brezhnev's long-standing proposal for an Asian security pact is designed to extend the Soviet influence to the Indian Ocean. The first steps were the friendship treaty with India in 1971, and the appearance of the Soviet fleet in the Indian Ocean and at the southern entrance to the Red Sea, where bases are available to it in Somalia and

• Pakisian is considered by the Russians as a major obstacle in this strategic concept. Although Moscow incessantly urges Pakistan to look with sympathy on the proposed Asian pact, it-would not be displeased to see Pakistan further dismembered following its loss of East Paki-

 This policy was reflected in: last year's coup d'état to Afghanistan, where a pro-Soviet regime is now in power. This outlanks there are reasons to believe that the Russians are quietly encouraging "autonomous" Pushtu tribes in areas contiguous to Afghan-

. By the same token, the Russians are taking considerable interest in agitation for the creation of a "Greater Baluchistan" from Pakistani and Iranian

The Russians seem to have accepted, at least for the time being their loss of influence in Egypt and possibly Syria, Instead. they are concentrating on Iraq (on hostile terms with Iran and Kuwaiti, Afghanistan and India. There may be Soviet backing for the Dhofar rebellion in Oman, a Persian Gulf littoral state. The Iraqis in turn, back the Baluchistan movement.

From all the foregoing, Premier Chou has reportedly concluded that the major thrust of the new Soviet policy is directed at this vast region, posing a threat to China as well as Pakistan and the Persian Gulf.

U.S. Embargo

Chine, therefore, would welcome a more energetic U.S. posture in its dealings with Mr. Brezhnev over this whole area. It is pleased with Washington's military cooperation with Iran and presumably, would look kindly upon the lifting of the American arms embargo against Pakistan. On this point, how-ever, the Pakistanis have made no progress despite the most recent discussion Mr. Ahmed has conducted with Mr. Nixon, Mr. Kissinger and Mr. Schlesinger. Pakistanis think that the Soviet military support for India renders meaningless the 1965 American embargo in South Asia.

China's annoyance with India, even antedating the recent Indian nuclear explosion, was illustrated by Premier Chon's refusal even to answer a recent private letter from Prime Minister Indira Gandhi, which proposed the normalization of diplomatic relations between the two countries. Premier Chou takes the view that India must first normalize its relations with Paki-

A final note about the Pakistani impressions gathered in Peking last month is that there is nothing to corroborate the reports that Premier Chou is being politically eclipsed by his deputy, Teng Hsiao-ping Although his health is frail and he missed some social events during the Bhutto visit. Mr. Chou personally conducted all the working sessions with the Pakisiani, and his political standing seemed beyond dispute. The Pakistanis could detect no veering away from the Chinese rela-

U.S. Studies Reverse Earlier View

Long Use of Marijuana Held Harmful

By Robert Joffee

LOS ANGELES (WP) - Marijuana may turn out to be more harmful than many scientists had previously thought.
Only a year ago most American researchers studying the drug

thought it probably was relatively harmless at least when compared with alcohol and other commonly abused drugs. Since then, however, new find-ings have raised the possibility

that long-term use of marijuana might be linked to damaged chromosomes, lower production of sex hormones and greater vulnerability to diseases. The new findings are prelimi-

nary and as yet unsubstantiated. ared to pre tigious scientific and medical journals -- journals which previously paid scant attention to the marinana issue. The findings also have political

significance in the United States. At a time when respectable voices are calling for laws making personal possession and use of the drug a misdemeanor or no crime at all, instead of a felony, the findings already have provided ammunition for those who oppose such moves. About \$4 million in U.S. government grants and contracts insure that the research will continue for one year more.

Dr. Morton Stenchever, an obstetrician at the University of Utah Medical Center in Salt Lake City, compared chromosome damage in a group of 49 marijuansusers with that in a control group of nonusers. His findings, published in January in the Journal of, Obstetrics and Gynecology. were that users averaged 3.4 chromosome breaks per 100 white blood cells while nonusers averaged only 1.2 breaks.

Dr. Stenchever explained that increased chromosome breaks might raise the likelihood of eventually getting cancer or becoming the parent of a child with birth defects.

Dr. Akira Morishima of the department of pediatries, Columbia University, New York City, has reported findings similar to Dr. Stenchever's.

The Stenchever and Morishima findings led the National Insti-tute on Drug Abuse—the government agency which bankrolls much of U.S. marijuana research to fund several projects in which other researchers will attempt to reproduce the Stenchever and Morishima research processes to determine whether similar findings can be obtained.

'Nebulous Field'

Controversy over the findings persists. "Genetic damage is an extremely nebulous field," said Dr. Lissy Jarvik, a pediatrician-psychiatrist doing genetic research at the University of California Medical Center in Los Angeles. Dr. Jarvik pointed out that "the body has repair mechanisms. Depending on the type of break. chromosome damage may have no effect. Also, cells in which breaks have occurred may die; and then again, there's no harm,"

The danger, she said, is that cells with abnormal chromosomes might multiply and produce identical also damaged cells. "Then, in 10 or 15 years, such cells might be responsible for causing can-'cer," she said.

"Whenever I present data, I'm immediately attacked by the other side." Dr. Stenchever retoris, Maybe she [Dr. Jarvik] didn't read my article." He intionship with the United States. sists that the increase in break-

serious concern, and he notes that half the drug users he studied took no other drugs except al-

Dr. Stenchever noted that, when it comes to chromosome breaks, other widely used drugs are probably as dangerous as marijuana. "I think the same rate of breakage probably occurred in Valium," he said. Va-lium, a tranquilizer, is one of the most common prescription drugs in the United States.

Few researchers are more cautious about the implications of their findings than Dr. Robert Kolodny, director of the infertility program at the Reproductive Biology Research Foundation in levels of testosterone, the principal male sex hormone, in marijuana users. Dr. Kolodny, 30. has been

working with Dr. William Masters, famed for his pioneer research in human sexual response, and Dr. Robert Kolodner and Dr. Gelson Toro.

In a recent article in the New England Journal of Medicine, Dr. Kolodny told how his group compared 20 men who used mariinana four days a week for a minimum of six months with 20 men who were nonusers. Testosterone levels in the users averaged a striking 40 per cent lower than in nonusers.

White Blood Cells

Dr. Kolodny speculated - and he stresses the word "speculate"
--that "there may be a decrease in fertility as a result of chronic, intensive marijuana use," the heavy users may encounter notency problems; the pregnant female users "may disrupt sexual differentiation in male fetuses during the second, third and fourth month of pregnancy; and that boys under 12 or 13 who smoke marijuana "may somehow disrupt completion of puberty impairing normal sexual develop-

Dr. Gabriel Nahas of Columbia University studied white blood cell production in 51 marijuana users. All the subjects reported times a week for four or more

years. He found that cell production in users averaged 40 per cent less than in a control group of

Since white blood cell production is considered vital to the body's ability to fight disease, he speculates that marijuana use impairs the immunity system.

The Nahas findings are viewed as significant because they show exactly the same low level of production in white cells taken from users that he found in ceils taken from nonusers and subsequently exposed to a marijuana agent in the test tube

"We'd all be surprised if Nahas's findings are replicated," Dr. Jarvik said, "I've spoken with a number of people in immunology and they're all extremely skep-Sources at the National In-

stitute on Drug Abuse, which is funding attempts to replicate the immunity-system research, said two papers prepared for publication this summer confirm the Nahas findings while a third. using different techniques, fails to do so.

Dr Stenchever, Dr. Morishima, Dr. Kolodny and Dr. Nahas all learned about the drug-use background of their test subjects ject to customs inspections.

through interviews with them Critics argue, with some justifi-cation, that interview information is not sufficiently reliable. Ideally, say the critics, a test

subject should be confined to a closely supervised hospital ward where researchers can make certain that he is under the influence only of the drug being tested-and feeling only the effect of a prescribed dose, Until recently, prescribed doses

of marijuana were unavailableand street doses varied enormously from cigarette to cigarette. But now, because pharmacologists have isolated tetrahydrocannabinol 'THC', the main intoxicating agent in marijuana. researchers can choose low-dose, rettes, In addition, researchers can obtain THC pills, so that marijuana can be administered

A bearded young man named Craig sat smoking a "joint" in a dimly lit room booming with stereophonic rock and roll, A nurse sat beside him to make sure he smoked the whole cigarette.

The smoking room was on the third floor of the Neuro-psychiatric Institute of the University of California at Los Angeles -and except for occasional supervised excursions to movie theaters and restaurants. Craig had been on that floor for almost 90 days. receiving \$25 a day for his work.

That work involves submitting to, and participating in, a daily battery of tests; being wired to brain-wave machines, pressing buttons when images appear on a screen, answering questions in almost incessant interviews, and taking written tests not unlike school admission exams

Dr. Sidney Cohen, a psychiatrist, and Phyllis Lessin, an

U.S., Chile Arrest 22 in Cocaine **Smuggling Case**

WASHINGTON, July 7 (AP).— A drug-snuggling ring alleged to have brought \$32.7-million worth of cocaine into this country from Chile in Chilean military aircraft and diplomatic pouches has been crippled with the arrest of 22 persons, the Justice Department said yesterday

Chilean authorities arrested 16 persons in Santiago, including members of the air force and navy. Six others were arrested last week in the Washington area, New York City and Madison. Wis.

The Justice Department said all 22 were key members of the ring. Sealed indictments were returned in New York on Friday but kept secret so that authorities could make the arrests simultaneously. Law agencies of the two countries cooperated in the investigation.

The ring was said to have smuggled at least 162 pounds of cocaine from Chile to New York through Washington between May, 1973, and last month. A spokesman said cocame has a street-sale value of more than \$500 a gram. The five-count indictment aile-

ges that a naval officer stationed in Valparaiso with access to diplomatic pouches arranged the sinuggling and that an officer stationed at the Chilean Embassy here received the incoming drugs. Diplomatic pouches are not subanthropologist, supervise the NPI "We've pretty well disproved

the old notion that marijuana produces a 'reverse tolerance.' Miss Lessin said. Reverse tolerance is a technical term for the old por smoker's notion that it takes less and less marijuana for an experienced user to get high, Dr. Cohen said NPI researchers have found that the drug produces real olerance, that one becomes inured to the effects of the same dosage if it received day after

Miss Lessin said NPI researchers also had disproved other myths about the drug, "We're learning that in many ways, it's a drug just like other drugs," she

Dr. Cohen provided two examples: "A lot of cops believe 'grass' dilates the pupils of the eye; when, in fact, if a suspect's nupils are dilated it's probably because of anxiety. As for the notion that pot excites sexual desire well we found that-like alcohol-it's sexually debilitating.

Withdrawal Symptoms

At the Langley-Porter Institute San Francisco, one strong manjuana cigarette a day is considered an extremely low dose Test subjects there orally receive the equivalent of a pack of such cicarettes each day. "Our subjects are pretty sedat-

ed when they first get started on the high dose," Dr. Reese Jones said. "Then, after six or seven days what looks like a tolerance develops, and they become more alert and zetive, both psycholosignally and physically. You could say they return to normal, "After two or three weeks, we

substitute a placebo ta pill with no THC); and suddenly the subjects become tritable and restless, and have trouble sleeping, They are probably suffering the symptoms of withdrawai from a physical dependence."

At such high doses, not presently available to ordinary users in the United States, Dr. Jones is convinced that THC closely resembles "sedatives-hynotic-type drugs, like alcohol and phenobar-

The "good news," he said in that test subjects tolerate high doses "extremely well," But the "bad news" is the similarity between THC and "drugs that cause serious problems for some people in our society who use them," About 40 miles south of San Francisco, at the Veterans Alministration Research Hospital in Palo Alto Dr. Leo Hollister, a pharmacologist, began some of the first U.S. government-sponsored marijuana research on human test subjects almost seven years

Today he and psychiatrist Jared Tinklenberg are comparing the effects of a single, normal dose of marijuana with similar doses of other drues.

The two men have observed that marijuana seems to disrupt the transfer of information in the brain from short-term to longterm memory, so that information acquired while under its influence is forgotten more easily than if it were acquired sober. "It's possible that marijuana al-

lows the brain to be flooded with prelevant information." Dr. Tinklenberg speculates, "The subject then fails to distinguish between important and unimportant facts. "Now we're trying to see if

marijuana shares this quality with

Russia's Worries On Class Privilege And Consumerism

By Murray Seeger

The Kremlin has issued warning against an attitude of "consumerism"-that is, the fascination with obtaining goods-and the official press has carried on long discussions about personal property and the varying levels of prosperity that are develop-

In one newspaper, the discussion was called "Children and Things," and in another It was People and Things.' Still another discussion was chilled.
"What Does It Mean to Live

sociologists would Western recognize the phenomenon as the result of rising expectations, of people working more as they get more from their society. There are also signs of clear distinctions developing between those who have and those who have not. Nina Danilova, a mother cyen, told how her son went for

of his father's heavy work boots. 'Badly Brought Up'

a walk in the rain wearing a pair

The came back in a bad mood and said that his new friend. the son of a highly qualified specialist, had made fun of his boots. I told him that that boy was badly brought up and told him to pay no attention to him because I could not afford to buy new boots immediately.

"Our children know that our wages are not high enough to buy expensive things, so there have never been requests for transistors or trousers of a special They know that they will buy the things for themselves when they start working."

There are many young Soviet citizens who do have money to spend for transistor radios, tape recorders, motoreveles and flared trousers, all of which sell for prices much higher than in the

The money to buy these goods -often on black markets active in many big cities-comes from parents who are highly rewarded the Soviet system, both in

At a popular restaurant recently a group of college-age youths was having a fine time over a fancy dinner topped with champagne. The girls and boys were smartly dressed in clothes not sold in Moscow and they were

smoking American cigaretics. "My father is a diplomat." a young man explained. "He brings things home with him from abroad and we buy a lot from

foreign tourists." Other families are allowed to shop at special stores reserved for special government ministries and departments of the Communist party. The stores are unmarked and guarded to bar those who

do not have the proper credentials, Converting Currency

Soviet citizens who have been abroad or have income from abroad can convert hard curreper into Special coupons which are accepted at the special food. clothing and appliance stores set up primarily to provide the best domestic products and many imported goods to foreigners.

There also are special health clinics and pharmacies where better quality medical care and drugs are available to members of a small group. There also are special, better-built apartments as well as country homes dachas located in prime sub-

Doors to better lower schools. where foreign languages are taught, and the best institutes and universities open more easily for some youths. Tickets for the best theater and concert performances and special events, like the recent visit of the La Scala Opera Company of Milan, are kent off the market and distributed to loyal party and ministerial Around the Black Sea, es-

pecially, there are many resort homes reserved for high government, military and party officials. Communist theoreticians state that the Soviet Union is presently at a stage of growth of "developed socialism" with two official classes, peasants and workers, and a subclassification of intellectuals. The classless society of pure communism awaits some time in the future. In parceling out privileges, how-

ever, it is apparent that the top level of party officials rank highest, followed by government officials, the military and internal police, trained specialists and performing artists.

The most conspicuous sign of privilege and status is a chauflered automobile with its back window discreetly shrouded by

gray curtains. For the highest 20 or 30 officials of the party polithuro, there are black Zil limousines, each handmade in a Moscow factory and valued at about \$80,000.

Soviet party chief Leonid Brezhnev often rides in a Rolls Rovce. while his armed guerds ride in

a Zil, on their high-speed trip:

The next level officials have Chaikas, a limousine sometimes used to escort the top officials
Empty or full, on their 22,7

salute from traffic policemen. While the Zil has never been sold to foreigners. Chaikas are used by some foreign diplomats and have lately been adopted by some American businessmen siztioned in Moscow. They cost about \$14,000 cach.

"When a driver gets in a Clarka he acts as important as his boss in the back seat," a Moscor taxi server, who had been pushed our of a lane by a limousing, commented recently.

Clear Privilege

For the wives of the men with the Zils and Charkas there are smaller Volgas, which also have curtained windows. These are the cars often seen parked outside the special, unmarked stores and delivering children to favored

Another clear mark of privilege is the ownership of a foreign-made car. For many years, only a few well-known citizens who had high incomes and the right to travel abroad could own such vehicles. Violinist David Oistrakh and composer Aram Khatchaturian each own a Mercedes-Benz, and Viktor Louis, a journalist and government propaganda agent,

owns two plus a Land Rover. In the last two years, however, the privilege of owning a foreign car has spread so that now many diplomats returning from duty overseas are allowed to bring home cars purchased abroad.

Russians also can buy used foreign cars at high prices in Moscow from a government agency. A 1969 Chevrolet, which cost about \$3,000 new, was recently sold to a Soviet citizen for 15,000 rubles, the equivalent of more

than \$20,000. Some of these privileges are granted by the government apparently to soak up excess cash that exists in the Societ economy. During years of having little to spend their money on, well-paid citizens have accumulated huge savings. The same reason led the government last winter to sharply raise the prices of fine furs.

families, there is a strong tendency for parents to spoil their children now that there are more things to buy.

Power of Things

"The problem is compounded by a tendency to exaggerate the power of things to make a fetish of them," Valentin Tolstykh told a forum conducted by the youth newspaper. Komsomolskaya Pravda,

"The problem was created by parents who like to repeat: 'Let my children not suffer things which I suffered."

It was understandable, he went on, for teen-agers to want the same nice things their friends have, "but I cannot understand the position of parents who try to satisfy the very first demand of their child even though it does not match their budget." These parents. Mr. Tolstykh said, did not want their children

to be worse than other youngsters and 'measure a personality by the things which surround them and not by the person's moral and spiritual qualities." An official Hero of Socialist Labor wrote Prayda, the party paper, that "satisfaction with life,

a real happiness, comes when man starts to realize that he works not only for a mere salary but creates material values, strengthens the power of his motherland and is useful to the collective and society." He admitted, however, that there are many "dodgers" who

"It is no secret that some people even envy such a man who has a car and an apartment with rug-covered floors and a beautiful dacha."

Credit Worries Among Banks, Give an Edge to 'Big Boys'

By Carl Gewirtz

PARIS, July 7 (IHT).—The eign exchange market with major siggest banks of the world appear to be on the verge of scor-do business or limiting their biggest banks of the world appear to be on the verge of scoring an inadvertent competitive eoup by driving the small, medium-sized and consortia banks out of the international market. Such a development would

further concentrate the power of the big banks and would turn the Eurocurrency market into one where borrowers plead for loans instead of the previous pattern where bankers fell over one an-

other drumming up new business. The coup would be inadvertent in that the big banks are not intentionally gauging up on the smaller establishments to score

z competitive advantage. But the force of events-uncertainty and fear about credit risks-is pushing them in that direction as they increasingly refuse to do business with their smaller competitors.

The discrimination has been apparent for some weeks, but the failure of Eankhaus Herstatt in Cologue two weeks ago and the clumsy way the West German authorities closed its doors have acceptuated the worries of bankers and widened the gulf between the 40 to 50 "big boys" and the hundreds of "small

In Forward Trading

Herstatt lost an estimated 480 million deutsche marks in forward trading in the foreign exchange However, to date only three banks have admitted getting burned in the affair and each of these was involved in spot transactions. Still unknown is the identity of the banks that could be on the losing end of Rerstatt's forward dealings. This has east suspicion on the for-

ACMAT Corp AES Tech Sys AITS Inc APS Inc .15e ASG Indust

transactions to only other majors rather than get caught in a bad deal with a bank that may be pulled down by Herstatt. A companion concern is the way in which Herstatt collapsedclosing its doors in the middle

of the business day, which is how the three banks that have reported losses so far got burned. These banks had transferred substantial amounts of deutsche nia:Es to Herstatt and were awaiting payment in dollar equivalent when the bank was closed.

Unless these losses are made good in their entirety, there may be a complete breakdown of the clearing system banks use to settle such debts and a loss of confidence within the international banking world.

U.S. banks have now started claiming the right to cancel foreign exchange dealings within 24 hours—a measure aimed at avoiding a repetition of the Herstatt experience—but this has introduced such an element of uncertainty into the market that dealings ground to a virtual halt last week.

This reinforces the trend among the top 40 to 50 major banks to t.ade almost exclusively among themselves. It left out in the cold the small and medium-sized banks as well as most of the conscrtia banks whose parents do not include the major banks.

These banks are also being squeezed on the Eurodollar market, where they are finding their access to funds extremely limited and where available, cash can only be had for a premium

of some three-eighths of a per cent over what the major banks

Rather than publicly admit to paying this premium these banks are passing up trying to raise cash through dollar certificates of deposit issued in London-leading to a sharp contraction in that market—and are increasingly relying on money brokers—for a commission of about one-sixteenth of a perceut—to arrange less visible inter-bank deposits at a premium. The premium coupled with the commission raises the cost of money for these institu-

tions and puts a terrible squeeze on their profits. The interest received from the floating-rate loan commitments they have is based on the six-month Eurodollar rate as quoted by one of the major banks-that is, minus the extra costs.

But in a growing number of cases, the major banks are not enticed by the premium on loans to small banks and simply refuse to do business with them. At the same time, there is a

very severe liquidity squeeze taking place in the Euromarkets, (Continued on Page 10, Cel. 7)

Friday's volume on the New York Stock Exchange dropped to 7.4.

and by the end of the week most other big banks had followed. The

move had little effect on the markets since most dealers had an-

ticipated it and analysts were predicting a prime rate resistance

million shares, its lowest level since Oct. 25, 1971. The Dow closed

Prices on the American Stock Exchange were mixed as volume

plummeted to its lowest point in eight years, due to the holiday and an exodus of traders from the city. Prices fell in the over-the-

led advances 315 to 255 while 267 were unchanged. The price of an

average share rose 11 cents.

In the counter market, the NASDAQ industrial index fell 0.09

to 73.8 while the composite index dropped 0.38 to 72.61.

The Amex market value index advanced 0.96 to 77.96 but declines.

Stocks took a major thumping Tuesday.

ustrials sank to a new low for the year of 790.68.

By Thomas E. Mullaney

NEW YORK, July 7 (NYT) -At the midpoint of every year, the spirits of businessmen are normally uplifted in anticipation of a faster-paced second half and the American public's sentiments are usually buoyed by the advent of holiday and vacation pleasures. But not this time.

The nation's mood is vastly different in this summer of 1974. The business world is tense and cautious. Investors are edgy. Throughout the land the public is concerned over its financial situation. Economists are dubi-ous about the outlook. Farmers and ranchers are incensed over their declining income. And government officials, as well, are patently worried over the state of the domestic and international economy.

The overriding-and overwhelming—problem of this era is the unrelenting surge of both interest rates and inflation, with all the actual and potential difficulties they pose for almost everyone.

Consumer and business budgets have been severely pinched causing considerable shifting and curtailment of normal spending oatterna. Such tremendous strains have been imposed on both that the threat of failures has risen immensely. Thrift and other financial institutions have been most severely affected.

Fear-Mongering

Not surprisingly in this atmosphere, fear-mongers have surfaced, spreading tales of impending doom and in the process making their own handsome profits, in some cases. There is reason enough for a full measure of gloom, although hardly the scope of disaster that some of the prophets foresee.

recession in this country may have receded since the end of the Arab oil embargo four months ago, there is as yet no evidence of any significant rebound here or elsewhere in the world. There-

in lies one fest of more serious troubles ahead. A greater threat, however, is the pervesive, high-level inflation that prevails in the United States and almost everywhere else. It has eroded confidence and draped a mask of false

it slightly ahead.

decision, however.

counter market

level closer to 13 per cent.

When data for the second quarter become available in the

next few weeks, they will probally show a return to a small margin of positive real growth by the domestic economy (after the first quarter's shocking negative

growth at a 64 per cent annual rate) but no significant reduction from its ominous double-digit rate of inflation. Meanwhile, the prime lending rate of

The Dow-Jones in-

While the danger of a deep prosperity over the face of the historic high at 12 per cent and ecession in this country may American economy, other rates are also highly

elevated. The picture could be brightened if, somehow, control could be regained over surging inflation. but no one seems to have any sure-fire answers for combating Washington has been grop ing for an answer and relying mainly on the orthodox remedy of tight fiscal and monetary

policies-without any effect so

There has been an appalling lack of leadership on this score, and I no impossive ideas. The effort to spur farm production promises some help in easing one source of excessive inflation— food prices—but nothing has been done to gain a rollback in the explosive rise in world petroleum costs, another major engine of inflation.

The business world evinces a sense of great frustration about all this and agonizes over what can be done. Its main response has been to push its own prices higher and higher, recognizing painfully that it risks a potential problem-consumer resistance to

What can the business world do as its contribution to the fight against inflation? In a

recent discussion, William May, chairman of the American Can Co., had that question put to him and his answer was: "About the only thing I see that we can do is to push as strongly as we can for increased productivity and be more value-conscious in the nature of the products we turn out." Economist Alan Greenspan said

that productivity increases by business "will obviously help" in the fight on inflation but that the most important effects will (Continued on Page 16, Col. 7)

BIF GROWTH FUND S.A. (in voluntary Liquidation)

NOTICE TO SHAREHOLDERS

The Liquidator of the Company has now prenared statements of the assets and liabilities of the Company and hereby declares that in accordance with the resolution passed by the General Meeting of the Company of 28th June. 1974, as envisaged by the agends set out in the Notice of Meeting, the net assets of the Company consist only of shares of CAPITAL INTERNATIONAL FUND (CIF) and that the dissolution of the Company will be completed by the distribution of such shares to the shareholders of the Company in the manner set out below in the following proportions:

In Respect of Each Share of the Company:

There will be posted to each holder of registered shares in the Company at his registered address and at his risk within 28 days from the date hereof a Certificate in registered form in respect of the shares in CIF to which he is entitled and a cheque in respect of any fractional entitlement.

Shares of CIF, together with cash representing fractional entitlements, will be made available at Kredietbank S.A. Luxembourgeoise. 37 Rue Notre-Dame, Luxembourg, to holders of bearer shares in the Company within 28 days after deposit of their share certificates and duly completed exchange forms at that address.

Receipts will be issued to shareholders on deposit of their

Receipts will be issued to shareholders on deposit of their share certificates and duly completed exchange forms.

share certificates and duly completed exchange forms.

After 30th June, 1975, any unclaimed shares of CIF will be sold and the proceeds deposited with Kredistbank S.A. Luxembourgeoise; if any of these amounts remain unclaimed after thirty years, they will revert to CIF.

CERTIFICATES REPRESENTING SHARES OF CIF WILL ONLY BE AVAILABLE FOR COLLECTION BY OR ON HEHALF OF BEARER SHAREHOLDERS OF THE COMPANY FOLLOWING DEPOSIT OF THE APPROPRIATE SHARE CERTIFICATES AND DULY COMPLETED EXCHANGE FORMS, EXCHANGE FORMS ARE AVAILABLE FOR COLLECTION AT:

KREDIETBANK S.A. LUXEMBOURGEOISE, 57 Rm Notre-Dame, Luxembourg.

Notice is hereby given to shareholders that a general meeting of the Company will be held at 3:00 p.m. on 28th July 1974 at 14 Rue Aldringen, Luxembourg, with the following agenda:

Agenda

(a) Report and presentation of the liquidation accounts by the liquidator;

(b) Appointment of an auditor or auditors to the liquidation;

Holders of bearer shares may vote at the meeting in person by producing at the meeting either their share certificates or a certificate of deposit which will be issued to them against deposit of their share certificates with Kredietbank S.A. Luxembourgeoise, or, if they have deposited their shares under I. above the relative receipt.

Shareholders may vote at the meeting by proxy by com-pleting the form of proxy which will be made available to them against deposit of their share certificates or receipts as afore-

There is no quorum requirement for this general meeting and the resolutions to be passed will require the concurrence of a simple majority of the total number of shares present at the meeting.

The Liquidator.

Determination of the date of a general meeting of share-holders to receive the report of the auditor(s).

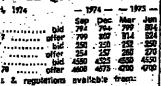

In Respect of Each Share of the Company: 0,402659 shares of CIF.

It could take you years to build up contacts in the Middle East. Oritcouldtakeonecall to Grindlays.

It has been calculated that on current trends, the oilproducing states of the Middle East will have foreign currency reserves approaching those of the USA within a few years.

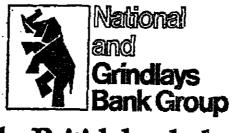

And it doesn't take an economic genius to work out that they'll be transformed into one of the richest overseas markets for British exports in the world.

Provided, that is, that British industry is quick off the mark when it comes to spotting new opportunities. And that's where the National and Grindlays Bank Group can help.

Because there are Grindlays branches and offices right there on the spot - in increasing numbers. All ready to provide market information, introductions to potential customers and help with the legal and administrative side of exporting, at the drop of a phone call or cable.

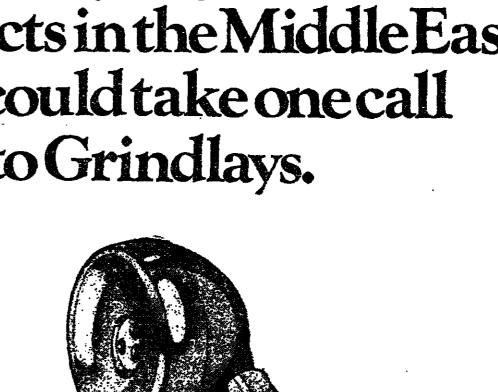

The Middle East is only one of the areas in which the Grindlays Bank Group provide a range of financial services to international business - from merchant banking to shipping finance, and from market information to high-level contact.

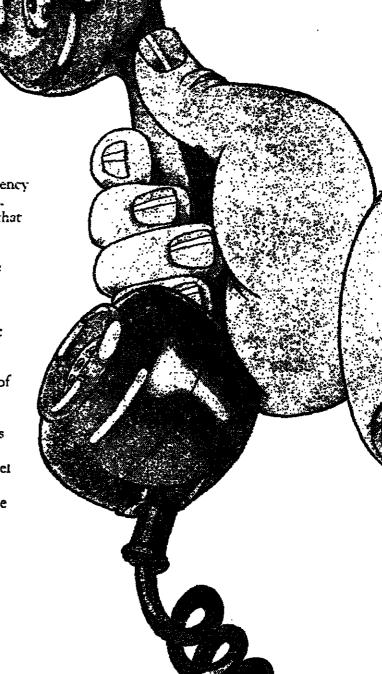

Please call them, and find out more. It could just be the most profitable contact of your life.

The British bank that's at home, abroad.

23 Fenchurch Street, London EC3M 3DD. Tel: 01-626 0545, ext. 248-Mr. David Gowers Telex: 885043-6

(Continued From Page \$) Rates on Eurodoliars, for example, are at a record high, ranghig from 13 to 14 1/2 per cent, depending on maturity. But what is especially surprising is that domestic U.S. interest rates are two to three percentage points below the Eurodollar rate and even this spread is not tempting money out of New York. To some extent this is explained by the heavy domestic U.S. demand for eash, obliging banks to put the needs of their regular clientele above the quick arbitrage profits available in Ru-

However, the differential also represents the extent to which the surplus dollar income of oil producers is being invested in New York rather than at the Eurobanks—in effect, a vote of no-confidence in the Eurodollar market in favor of the domestic U.S. market.

Yet another phenomenon is reportedly taking place. While the smaller banks are screaming for funds, the larger Eurobanks are reported to be turning down the offer of short-term Arab dollars. A number of U.S. banks are under pressure from the Federal Reserve to slow their growth-including the increase in their denosits-until they can increase the size of their capital

Such increases are impossible at present as both bond and stock markets around the world are in a parlous state and it would be exceedingly difficult and ex-pensive for the banks to try to raise new capital in these condi-

This is driving Arab dollars into Treasury bills—the rates for which are way below other market rates.
Meanwhile, countries which

have arranged Burodollar loans to help cover their trade and payments deficits are taking dol-lars out of the Eurodollar pool to pay their oil bills. But as the Arabs are not placing their dollars on deposit in the Eurodollar market, there is a very severe con-traction of liquidity, adding new strains to a market already overburdened with rumors and fears of imminent sollapse. This squeeze has led to a

virtual halt in attempting to put together new syndicated loans in the Eurocurrency market.
There are fewer banks doing

basis than before." a Louidon-bas-

No Buoyancy At Midyear

come from tighter fiscal and monetary policies by government because "inflation is a political, not an economic question." He said he felt that Washington-the administration and the Conthings_belatedly."

American accomplishments in which had been so impressive in earlier times, have diminished considerably in recent years while inflationary pressures here have been mounting.

At the same time, major tradin partners abroad were keeping better control on their costs, improving their productivity substantially and thereby expanding their exports to a greater degree than was this country. Even though American productivity is expected to improve,

while inflation declines somewhat in subsequent quarters of this year, the consensus is that inflation will continue at an inordinately high and unsustainable level, far outpacing any improve-ment in productivity. In that case, American business obviously has its work cut out for itself

market must now go elsewhere The question, however, is where According to data compiled by International Insider, \$5.3 billion worth of medium-term syndicated Eurocurrency bank credits were arranged during the second quarter-a 50 per cent drop from the volume in the first quarter However, for the first six months \$15.8 billion worth of loans were arranged, compared with \$7.3 blilion in the 1973 period and an estimated \$20 billion for all of last year.

had been looking to tap this

Squeeze Takes Toll

As in past weeks, the credit squeeze and the deteriorating air of confidence is taking its tall on the Europond market, where prices continue to drop without triggering any buying interest.

Pigures compiled by Credit Lyonnais and Kredietbank Luxembourgeoise show that for the first six months of the year new-issue volume fell to convergent of \$771 million com pared with \$2.25 billion in the year-ago half. Volume in the April to June quarter at \$263 million was almost half that of the first quarter's \$508 million. Of the 30 loans floated so far this year, 21 were denominated in dollars, five in Units of Arcount, two in Canadian dollars, one in DM and one in the Euro currency cocktail

Kredictbank led the list of issues managed or co-managed with 17 loans totaling the equivalent of \$418.5 million. Ste Générale de Banque was second with 14 issues worth \$406.68 million Paribas managed 10 issues worth \$279.5 million; Dresdner had nine issues worth \$269.9 million and Banque de Bruxelles managed 11 esues worth \$266.8 million.

Coronary Death Rate in U.S. Has Been Falling, Study Finds

By Lawrence Femberg WASHINGTON, July 7 (WP). United States has been stead -After rising for several decades, the death rate from coronary

States has fallen steadily since 1963, according to a government study. The exact reasons for the turnabout are uncertain. The decline has been most

substantial, the figures indicate, among white males, particularly in middle age. Even so, white males still have a higher death rate from heart attacks than either women or nonwhites.".

"It's surprising to many people, but something good really has happened," said Joan Klebba, a statistician at the National Center for Health Statistics and chief author of the study. "We've spent billions on medical care and research. Some of it-

onary death rate, when adjusted to take into account the changing age pattern of the popula-tion, reached a peak in 1983. It fell between then and 1971 by 10.5 per cent. Preliminary figures from later years indicate that the

decline has continued. From 1950 to 1963, the coronary death rate had risen by 19 per cent and slightly less than that during the previous decade. The rates are expressed as deaths per 100,000 population.

They are first computed for specific 10-year age groups and then adjusted by a mathematical formula to discount the effect of the changing age structure. Without adjusting for age, the

for about a decade even though the rates for nearly every specific age group have declined. This paradox has been caused by the fact that there are now relatively more older people in the population and that this expanding group (over 65) is the one with the most fairl heart attacks.

Miss Kiebba said the crude
death rate masks the progress that has taken place.

More Attention For example, among white males, the coronary death rate for those aged 45 to 54 dropped from 401.8 per 100,000 in 1983 to 324.8 in 1971, a decline of 19.2 per cent, which is the largest for

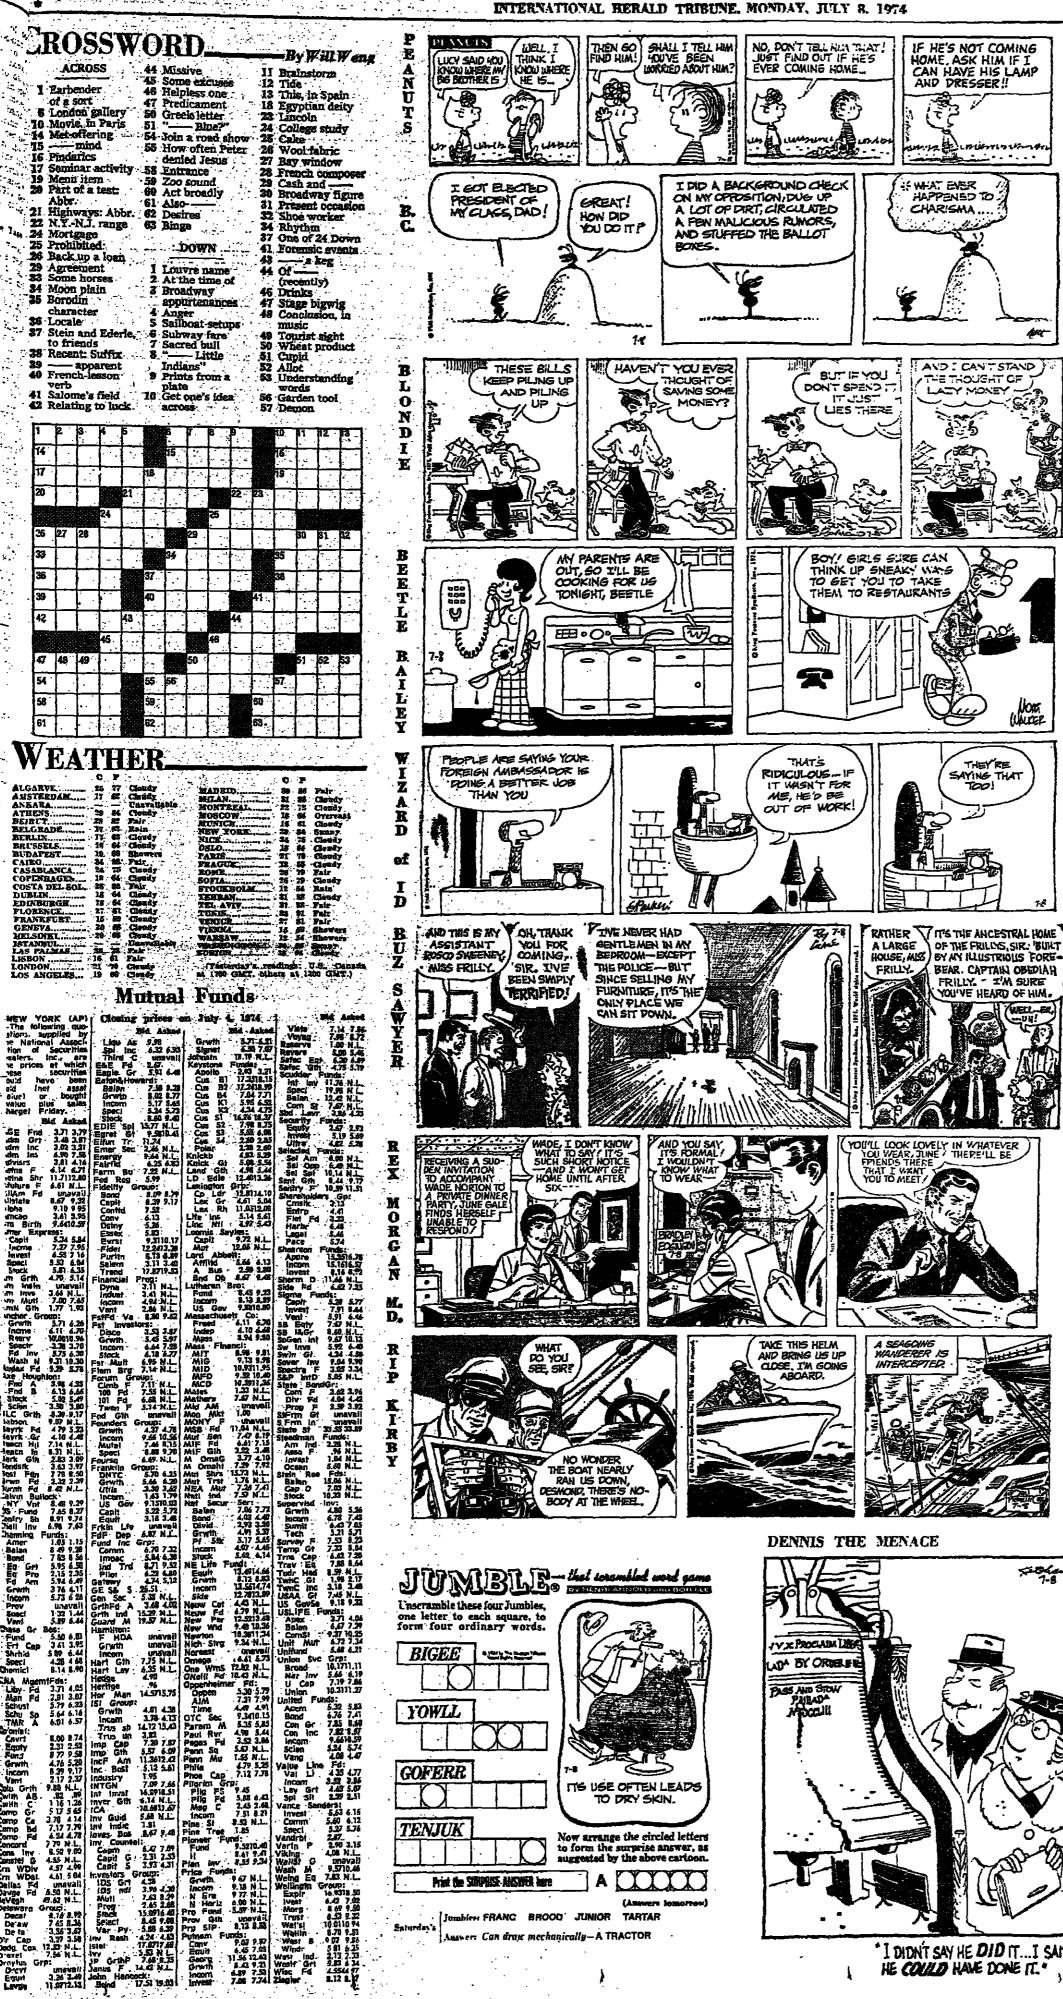

any group covered in the study. The changes seem to be real, said Dr. Peter Frommer, head of the Cardiology section of the National Heart and Lung Instiute. We're impressed by them."

Dr. Frommer said that since the

early 1960s, when coronary care hospitals, physicians have been paying more aggressive attention to coronary heart disease." "Now we know you can d

something about it," he said. Dr. Frommer added that there also has been more widespread treatment of high blood pressure and more attention paid to limit-ing fats in the diet and less cigarette smoking, particularly among middle-aged men.

Despite the drop in the coronar death rate, heart stracks remain by far the leading cause death in the United States.

BOOKS_

Criminals at Large

By Newgate Callendar

RATHER weird and unclassi- develop between the two. The A fiable book is Christopher Lesch's "The Send-Off" (Scribner's, \$4.95. Its basic ingredients put it into the mystery category; its treatment and interpretation give it literary quality. Anyway, here is this very normal, middle-class British couple who, with daughter and son-in-law, are just about to go on vacation. The day before they are to leave for Spain, the lady of the house discovers a corpse in the kitchen.

So they get rid of the body. Or. at least, they try to get rid of it. It is a most persistent body. It also continues to bleed. dead as it apparently is after a long time in the deep freeze. They try to bury it. The body comes alive. The church won't take it. The army won't either the body is in a soldier's uni-form. The police won't touch it -arong county. Meanwhile the body continues to bleed. The family grumbles about the mess it is making. At the very end the body pops up somewhere else, and the family hastily departs on vacation.

An obvious parable suggests itself: the body, as Christ, return-ed to a society divorced of all feeling. The horror of the con-ception is heightened by Leach's matter-of-fact, colloquial prose and speech patterns. He has a remarkable ear for dialogue, and he uses it with the finesse of a surgeon working on a detached retina. The two men put the body in the freezer, and the women are summoned. . Come and look

"I don't want to, thank you."
"It's a family affair." said Mr. Jardine. 'All for one, one for all. If we're getting to Spain tomorrow everyone'll have to help. You look. Nance. And you,

Em. Go on. "They crossed to the freezer.
"Tsk, tsk, said Mrs. Jardine. He doesn't look English to me. More German. That fair hair." Just people, amiably taiking in the family kitchen.

Leach is a British writer, and so is another fine stylist, Desmond Cory, whose latest work is "A Bit of a Shunt Up the River" (Doubleday, \$4.95). There is plenty of action in the book but Cory tries for something more: a look at the relation between hunter and hunted and the curious kind of sympathy that can

criminal is a killer who breaks isll and goes after former mem-bers of the gang, who had double-crossed him. The hero is an en-grand-prix driver, and the climan of the book is a terrible exciting auto chase in the rem —a Bentley against a Lambor-chini, Very taut. Very civilized. David Lippincott's "The Voice

Armaceddon" Pulnam 8. \$5.95; is, in a way, a fable of our times. Lippincott has been thinking about such figures as Bremer, the malcontent who shot Gov. George Wallace, and he has created a book about one such person. This one is smart but mentally til. He wants his name to go down in history, perhaps at the creator of an assassination against which all future assassinations will be measured. happingot keeps the reader in doubt about the actual exploit until the last few pages. When it does happen it is a bit of an antichmax, nowhere near as hornote or imaginative as it could have been. But Lippincott is a good writer, and once you start

this book you will be hooked.

The third in the Alec Hair series is "Peruvian Printout"
Dodd, Mead, \$4.95., Alec Hair in the author's pseudonym, and also the name of the book's hero. Thereor he lives his own fantasy life, and he does not stint him-self. In addition to being the head of security for a giant conciomerate, Hair is infinitely rich, infinitely powerful, infinitely re-sourceful, Superman stuff, but

fun in a brautless sort of way.
"Peruman Printout" wanders all over the world, but the main action is in Peru. As in the previous books, computer technolocy plays a large part. An ingenious criminal works up an idea to beat the system. An expert on computers, he tampers with the international network te skim off millions. Lots of action, killing galore, international politics, hand-to-hand combat at the end. You won't believe a word of it, but you won't be bored. either.

Something of a case history. Bill S. Ballinger's "The Corsican" Dodd. Mead. \$7.95: starts with an ambitious kid in Corsica and follows him through as he forms his own family makes an alliance with the Union Corse. moves to Marseilles after the war and becomes one of the biggest gangsters in Europe. Then a conflict with the Mafia and a surprise ending. Past, smooth, be-hevable. Less successful is the normally reliable Patricia Highsmith's "Ripley's Game" (Knopf, \$5.95. A man dying of leukemia is approached to do some killings. He needs the money and agrees. Tom Ripley, who has appeared in previous Highsmith books, helps the sick man. There is too much talk, not enough action and an inconclusive ending.

BISGUIER/WHITE

Position after 18 B-KNI

was first employed with suc-cess by Mikhail Tal against Johannessen in Reykjavik,

1964 (though the moves 5... O-O and 6 B-K2 had been interpolated). However, 9... B-N5 would have been a

B-N5 would have been a stronger way to put Bisguier under pressure than Solris's 9...N-B3.
Solris's 12...Q-R3? was an

extravagant attempt to put pressure on the White queen-side; it would have been far

more prudent to try 12... NxB; 13 QxN, P-B1. Bisguier found a way to

take advantage of the queen's embarrassing position with 17 N-N5!, threatening both 18 N-B7 and 18 KN-Q4.

And That's That!

Soltis's 17...N-Q4 was an ingenious, if short-lived, attempt to hold his position together, the point being that 18 PxN, QxN; 19 PxB, BxR; 20 B-Q3, Q-Q4 wins for Black. However, after Bisguier's cool 18 B-KN1!, Soltis was stymied since 18... BxR.

was stymied since 18... BxR; 19 QxB, QR-B1; 20 PxN, QxN; 21 N-B3 enables White

to gain two pieces for rook

and pawn.
Finally Bisguier was ready
for 19 PxN because his 20
B-Q3! aborted Black's hope

Q-Q5ch! prevented Soltis

By Robert Byrne

CHESS

Hypermodern play, though supposedly a system of re-strained, refined maneuver-ing, has this in common with gambit play: it requires sac-rificing.

To be sure, the hypermodernist does not throw away pawns or pieces the way the gambiteer does, but that is because he aims at a different objective. The gambiteer offers material to gain time for direct attack; the hypermodernist offers terrain in return for dynamic counterattack.

In such typical hypermodern openings as the King's Indian Defense or the Alekhine Defense, Black permits, even encourages, White to undertake rapid pawn pos-session of the center on a grand scale; Black's plan is to hit the bloated, overextended structure with the precisely timed thrust that will crumble it. Even if White should maintain his pawn formation intact, he might be forced onto the defensive for the remainder of the game to shore it up.

Hard to Overlook Meanwhile, however, the obtrusive fact is White's imposing center; if the hypermodernist cannot recover a grip on it, his gambit will have failed and he will have to suffer a cramped position for the rest of the game. In the final-round game between Arthur Bisguier and Andrew Soltis in the Gold-

Tournament, Black's hypermodernism went wildly awry and Bisguier swept through to a sharp tactical victory. Bisguier's 5 P-B4, initiating the Four Pawns Attack, threatened to overthrow the Vine's Indian Defense in the King's Indian Defense in the nineteen-twenties, but nowa-days it is rarely seen, not because it has met with refutation, but because it usually

WIMBLEDON, England, July 7 (NYT) -For the fourth time in the match. 20 years, Ken Rosewall came second best from the Wimbledon men's tennis finals as marvelous returns, Then he pushhe was demolished yesterday by ed a backhand low into the net

and serve, 6-1, 6-1, 6-4. The 93-minute victory gave the United States . sweep of the singles titles, since Chris Evert, Cennors's linaucee, beat Olga Morozova in the women's final on

Jimme Connors's weight of stroke

Rosewall, the sentimental favorite never got in the match. He was outrun and outlit, a early 39-year-old man who had left his game in the dressing

Connors was superb. The 21year-old lefthander, joint No. 1 in the United States with Stan Smith, had a plan of attack and kept to it.

Beaten to the Punch He stayed in the backcourt at

first, hitting hard and deep to get the feel taking the ball on the rise and swinging it from side to side. Rosewall could do little about it. He was beaten to the punch, battered by two-fisted backhands that knocked him off balance.

The Australian won the first game and then the avalanche hit Connors held service and went to work on Rosewall's service. A forehand pass, a sm. th on a short lob. a two-hander into the corner and then the break to 2-1 as Rosewall backhanded over the line.

Quickly Connors was at set point, slipping a backhand through the hole for 6-1. Only 21 minutes had passed and the crowd was mute in sympathy.

Rosewall kept waiting for a lift, some inspiration of thought or stroke. In the opening game of the second set, he unsheathed what is recognized as the best backhand in tennis. But it wasn t good enough.

Six Times at Deuce

With uncanny anticipation, Connors was there. Six times they were at deuce, with Rosewall once at break point. But a forehand volley on the stretch had the Australian beaten

Normally Conners, with his speed of foot, hustles to the net behind his spinning southpaw service. For a while he stayed back, content to pick up the Rosewall return and then forage forward. He was lucky now. A net-cord shot put him a 2-0. another netcord helped save his service and then, with 10 games in a row, he reached 4-0

Rusewall jumped up and down on the back line and won a came. but it was unearned. For a minute Connors was human. He hit a couple into the net and doublefaulted for 4-1.

Connors was brimming with confidence and his percentage of good shots was incredible as the two-fisters brought up the chalk from the lines and the overheads jumped off the grass. The second set was on the board at 6-1, then Connors had the break at 1-0. Was Rosewall ever going to move?

Rosewall's Bid

Leading by 2-1, he made his Davis Cup Special Management bid. He was at 30-40 on a back-hand rifled to Connors's feet, then was brought back to deuce. He was at ad-out on a backhand pass Deuce again. One more advantage on a backhand volley, Could be get the oreak that might mean the set? Connors squashed his hopes, smashing for that

Defeat A's

Blair, McNally Pace Orioles

OAKLAND, Calif., July 7 (UPI).-Paul Blair got the first hit off Ken Holtzman, a sixthinning homer, and later tripled and scored a run while Dave McNally went the distance on a five-hitter today in leading the Baltimore Orioles to a 4-1 victory

over the Oakland A's. Holtzman carried a 1-0 lead into the sixth when, after one out, Blair hit his ninth homer

Sunday

It became 2-1 in the seventh when Don Baylor hit his fourth homer and in the eighth, back-toback triples by Blair and Bobby Grich finished Holtzman, Tommy Davis added a run-scoring single off Rollie Fingers to complete the Baltimore scoring.

Royals 11, Red Sox 9 At Boston, Hal McRae's single and Fran Healy's sacrifice fly drove home runs in the 10th inning to give Kansas City an 11-9 victory over the Red Sox in the first game of a double-header. It was the fifth con-secutive defeat for Boston.

George Brett walked to lead off the 10th and was sacrificed to second by Cookie Rojas. Amos Otis walked, McRae singled to score Brett and, after John Mayberry walked, Healy's sacrifice fly scored Otis.

Rick Miller drove in five runs for Boston with his first career grand slam, in the sixth, a double and three singles. One of his singles set up the game-tying run in the eighth inning.

Brewers 8, Twins 5 At Milwaukee, Don Money tied the major league record for consecutive errorless games at third base in one season and Mike Hegan and Darrell Porter each drove in three runs to lead the Brewers to an 8-5 victory over Minnesots in the first game of

Money tied the record of 77 games, set by Boston's Rico Petrocelli in 1971. The record for consecutive errorless games over more than one season is 97 by the Giants' Jim Davenport from 1966 to 1968. Money has a carry-over of two errorless

games from last year. White Sox 3, Tigers 1

At Detroit Bart Johnson nitched a two-hitter in his first anpearance of the season for Chicago, giving up a solo home run to Norm Cash in the second in-ning, in pitching the White Sox to a 3-1 victory over the Tigers. Johnson retired 20 consecutive batters between the home run and Mickey Stanley's leadoff single in the ninth. He picked up his first victory as a starter since July 4, 1973, and chalked up his first complete game in the ed up from the minors on Friday. Mets 6, Giants 6

At New York, Teddy Martinez's three-run triple high-lighted a five-run first inning and led the Mets to a 6-0 victory over San Francisco on a combined threehitter by Tom Seaver and Bob Apodaca. Losing pitcher Ron Bryant, 2-11, retired the first two Met batters before Rusty Staub singled. He advanced to second when Cleon Jones walked. and scored on John Milner's single. Jerry Grote's single drove in Jones with the Mets' second run and after Don Hahn walked, Charlie Williams replaced Bryant, Martines followed with his hit off the left-field wall

Seaver, now 6-6, won his third game in a row. The Met righthander left the game after five innings after aggravating his strained left hip fielding Chris Speir's bunt for the final out in the first imping

Reds 2 Cards 1

At Cincinnati, Cesar Geronimo hit a tie-breaking home run in the seventh inning as two rookie pitchers, Tom Carroll and Will McEnancy teamed up to pitch the Reds to a 2-1 victory over St. Louis in the first game of a doubleheader, Geronimo's homer, his third of the season, came off rookie right-hander Bob Forsch v ho was making his major league debut.

Phillies 9, Padres 3 At Philadelphia, Willie Monta-nez had a double and two singles home to put Woods's 14th victory

NATIONAL LEAGUE

(First Game)

(Second Game)

(First Game)

lies defeated San Diego, 9-3. Philadelphia scored nine runs in the first four innings and Jim Lonborg went on to post his 11th victory against seven defeats.

Dodgers 4, Expos 1 At Montreal Tommy John with relief help from Mike Marshall, became the winningest pitcher in the National League when he scored his 13th victory as Los Angeles defeated the Expos. 4-1. in the first game of a double-

John, now 13-2, worked 7 L'3 innings, gave up seven hits while walking three and striking out three before giving way to Mar-shall in the eighth inning. Marshall cathe in with a runner on first base, retired the next two hatters and pitched a scoreless ninth to earn his 12th save.

At Chicago, Bick Monday hit a two-strike two-run homer with one out in the seventh inning to give the Cubs a 4-3 triumph over Atlanta and pin Braves pitcher Busz Capra with his first loss after ning straight victories.

Atlanta's first two runs were driven bome in the fourth by Henry Asron, who hit his 725th career homer. If was Asron's 12th homer of the season. Pirates 6, Astros 4

At Honston, Bob Robertson's two-run home run in the 10th in-ning powered the Pittsburgh Pirates to a 6-4 victory over the Astros. Robertson's homer, his ninth, came after reliever Fred Scherman walked Willie Stargell to open the 10th, Earlier, Richie Zisk had two homers for Pitta-

Indians Move Into First

ANAHEIM, Calif., July 7 (UPI). The Cleveland Indians, who finished last and 26 games behind in the American League East last year, moved into sole possession of first place yesterday. The Indians took over the top

spot as they beat the California Angels, 1-0, while the Boston Red Sox were losing to Kansas City. Buddy Bell's single in the fourth inning drove home the only run Cleveland pitchers Dick Bosman and Tom Buskey needed. Bosman, making his third start of the season, went 6 1/3 innings and then Buskey came on to protect the lead.

Cleveland now leads Boston by

one game, while Baltimore and Detroit are only two behind in the tightening race.

Royals 5, Red Sex S At Boston, Hal McRae, Tony Solalta and Fran Healy each had two hits and an RBI as Kansas defeated the Red Sox 5-2. Kansas City pounded out 11-hits and Nelson Briles picked up his first victory of the year against two

The Royals touched Boston's Rick Wise for five runs in the first five innings to hand the injury-hampered pitcher his fourth loss against three vic-

Orioles 3. A's 6 At Oakland, Calif. Ross Grimsley pitched a five-hit shutout for his 10th victory and Brooks Robinson and Paul Blair hit solo home runs in pacing the Ba more Orioles to a 36 taleingli over the A's. Robinson hit his third homer in the second inning and Blair his eighth in the sixth A single by Mark Belanger in the fourth, following a double by Andy Etchebarren, accounted for the other Oriole run as Baltimore moved ahead of Detroit by one percentage point for third place in the American League East. It was Grimsley's second shutout of the season, his third victory without a loss over Oakland, and his 10th complete game in:

20 starts. He now is 10-7. Brewers 3, Twins 0 At Milwaukee, Bill Champion. Eduardo Rodriguez and Tom Murphy combined for a six-hit shutout and Dave Mays hit a two-run double as the Brewers beat Minnesote 3-0.

White Sox 9, Tigers 8 At Detroit, Carlos May, Dick

Allen and Bill Melton each hit nome runs to help Chicago to a 9-0 lead but pitchers Wilbur Wood and Terry Porster needed every one of those tallies as the Tigers rallied for eight runs in the fifth and sixth innings in a 9-8 victory by the White Sox. May's fourth homes of the

season came with two on in the second after Ron Santo had singled home two runs and Ken-Henderson another to give Wood the lead. Allen opened the fifth with his 21st homer, Melton followed with his 10th and Bucky Dent singled home a run before the Tigers began their comeback Ed Brinkman hit a two-run homer in the fifth, his eighth to equal his career high for a sesson, Willie Horton tripled home two more runs in the inning

opened the sixth by yielding two singles and Mickey Stanley's fifth homer but then settled down and allowed just three hits the rest of the way for his 13th save.

Yanks 9, Rangers 3 At Arlington, Texas, Thurman Munson rapped a two-run homer and Chris Chambliss added a three-run shot powering the New York Yankees to a 9- victory over the Rangers.

Cards 3, Reds 1 At Cincinnatt, Bob Gibson singled home the winning run during a seventh-inning rally and he stopped the Reds on three hits as St. Louis won, 3-1. The victory was the fifth of the season against eight losses for Gibson, whose six strikeouts left him shy of a career total of 3,000.

Giants 5, Mets 7 At New York, Gary Matthews slammed a two-run homer sif Met relief ace Tug McGraw in the sixth iming to give San Francisco a 5-2 victory over New York Garry Maddox had open-ed the inning with a single to right, knocking out starter George Stone. McGraw got Bobby Bonds on a greender, but Matthews, wind had three hits in the game, lot-

W. Germans Beat Dutch, 2-1, to Win World Cup

Mueller's Goal Is Decisive

By Brian Glanville

NICH, July 7 (IHT) - West. any, 2-1 victors over the rlands, is the new World soccer champion. It is the d time it has won soccer's prestigious title.

spite the traumatic blow of g away a goal on a penalty e very first minute, the West sans recovered to score before halftime, and hold the Dutch revival in the & half. Perhaps, it could aid, that the result turned miss by Johnny Rep, a save epp Maier late in the first. Had the Dutch scored then t well have kept it. As it it was Gerd Mueller, leading r of the 1970 World Cup, who he decisive goal for the Ger-

spite the early penalty, when n Cruyif walked around him he weren't there, West Geri's decision to play Berti s on Cruyff was largely sucul. It was by no means the ipliant day for Cruyff which might have expected, rially after so explosive a ming. On the other hand, is not an entirely exceptional. a for the West German hero. z Beckenbauer, who played ily and somewhat cautiously iciense, and was only once seen striking for goal. That, lover, was from a free kick. ie Dutch defense, as had been ripated, was often highly erable. The Netherlands are reat team when they are g forward. The West Gers, perhaps a little lucky to all-around team, either. I ainly would not categorize n with the Brazilians who

Once they had thrown off the yoke of their interiority feelings, and tied the Dutch, however, the Germans played some last, incisive football, Uli Horness and Rainer Bonhof, who has revitalized their midfield, bursting up in support of Mueller and Bernd Hoelzenbein: Hoelzenbein; indeed, had a surprisingly effective match. gaining considerable confidence after his part in the German penalty. Of Bonhof it may besaid that he ultimately had the better of an intriguing duel with Johan Neeskens.

Perhaps the pick of this excit-ing if soluble Dutch team was Wim Van Hanegen, that remarkable mixture of strength and subtlety. He had a superb match, holding off opponents when he had the ball and passing it superbly both short and effortlessly long. There were also times when he was dangerous with his

- Quick Goal

No World Cup final has had a more astonishing start than this one, which produced a firstminute penalty and a goal for the Netherlands. Indeed, not a single West German player had effectively touched the ball when Johan Cruyff was brought down in the penalty area and Jack. Taylor, the English referee, bravely and firmly awarded the kick: Neeskens, who had already converted two panalty kicks against the Bulgarians, smashed an unanswerable right-footed shot past Sepp Maier.

The Dutch movement, which proceded the penalty, was a sindy in calm, almost provocative, possession tootball. The hugh Ger-

for once leaving his job as Cruyif's guardian, to break right through the shallow Dutch defense, and shoot for the very corner where Breitner had scored. But Jongblood, 33-year-old Dutch goulkeeper, made a memorable one-handed save. Jongblood, however, is not quite

so good when it comes to intercepting high crosses. One, from Overath, he managed only to paw out but recovered to kick clear from the advancing Juergen Grabowski. Then, Hoeness, with a dynamic burst of speed, was past Wim Sunrhier on the left, rolling the ball wide of Jongblood, only for Wim Rijsbergen to kick clear from the goalmouth.

Two minutes more and Hoeness ran over the ball at a free kick, Franz Beckenbauer following up to send in a cunning lob, which Jonephood at full stretch P over the bar. But if you attack, there is always the danger that you leave yourself thin at the back; and this the Germans did. Away came the Dutch, with only Beckenbauer to face Cruyii and Rep, who was on his captain's left. Mathematically, it should have been an inevitable goal, as Cruyff very correctly drew Beckenbauer and passed to Rep. But Rep was not skillful enough to beat Maler, who saved admira-

It was a very expensive error. With a couple of minutes left to halftime, the West Germans again exposed the limitations of the Dutch defense and scored the goal which would dive them the World Cup. It was Grabowski who cleverly began the move with a pass up the right to the powerful Bonhot. The midfield player beat Arle Haan for speed on the outside, crossed a ball the Dutch couldn't clear, and Gerd Mueller swept it into the left-hand corner

lands took off Robby Reesen-brink, who had been pronounced fit only at the last moment, and brought on Rene Van De Kerhof, one of two footballing twins, as a substitute. He is a fast lanky

British Lions Triumph

PRETORIA, South Africa. July (AP).—The touring British Lions rugby union team edged a Northern Transvaal side, 16-12,

the field; rolling the ball about with casual command, easily subduing an unimaginative West German attack. Then, believe it or not, another penalty enabled West Germany to equalize. Most of the credit went to

Hoelzenbein, one of the lesser names in the West German team. A clever pass by Wolfgang Overath, always a diligent worker, in midfield and even on defense, sent him and Paul Breitner dashing up the left wing. Hoelzenbein could have passed to Breitner, but he boldly decided to go it alone, spurting into the penalty area, where he was tripped by a desperate Wim Jansen. It was Breitner who scored from the penalty, his third goal of the World Cup, sending the ball low between goalie Jan Jongblood and the left-hand post. Helmuth Schoen, the West German coach, was justified in preferring him to Hoeness, who had missed the previous penalty against Poland. This success completely trans-

formed the West Germans, who now emerged rampantly from under the shadow of that crip-pling first-minute penalty. The only way to live with the Dutch either wing. is to attack, and this the Germans now found the spirit could do. enbein sent through Vogts,

bly at his feet.

Poland's coach. Kazimierz Gorski said his team had learned several lessons from this year's World Cup:

"It is good to play offensively but the main thing is to be able to quickly change from the offensive to the defensive and back again. Whoever masters this will be world champion."

Visit to China

MUNICH, July 7 (UPI).-Jo20 Havelence, the new president of the International Football Federation (FIFA), will visit China later this year to try to find a compromise to enable it to join

The decision to send Havelange. a Brazilian, was taken by the executive committee yesterday. The president and other FIFA members will visit China after the FIFA congress in Rome in November.

China's application to join FIFA on condition that Taiwan is expelled was turned down June 11 at the FIFA congress.

A request by the Iranian delegate to FIFA to sanction China's participation in the Asian Games soccer tournament in Tehran in September was rejected. But the committee said it would not disbar any team if it played against the Chinese, a spokesman said.

National and club teams also will be able to play in China if they receive FIFA permission

Cowboys Open Rookie Camp Early to Avoid NFL Pickets

WASHINGTON, July 7 (AP) .- Tex Schramm, president and gen-The Dallas Cowboys outflanked their veterans yesterday and slipped all but one of their rookies ir training camp a day ahead of schedule.

Thus the Cowboys duplicated the feat of the San Diego Chargers, who earlier last week got their rookies into camp ahead of time, avoiding a direct confrontation with picketing members of the NFL Players Association.

The association established a picket line in midafternoon at California Lutheran College in Thousand Oaks, Calif., but 58 of the Cowboys' 59 rookies aiready had reported.

About a dozen pickets-mostly

from teams other than Dallas but including the Cowboys' star running back, Calvic Hill-did not know the rookies were in camp. "We wanted to get ready early to avoid any confrontation," said

unpleasant incidents. We have a right to conduct practices in an informal manner and they lycterans! have the right under the law to picket." Bill Curry, president of the striking players, said the association will do everything legally within its power, including solicit-

eral manager of the Cowboys.

"We hope to conduct normal

practices and we don't want any

ing aid from other unions, to prevent NFL exhibition games if the strike is not settled Curry, the starting center for

Houston last season, joined 14 veterans in picketing at Sam Houston State University in Huntsville, Texas, as the first of 104 Oiler rookies and free agents reached training camp.

Doubtful on Game

In Miami, veteran center Jim Langer of the Miami Dolphina. who said he will ignore any pickets and report to camp, added that even if most of his teammates want to play in the college ali-star game July 26 they probably will not get the chance.

Langer said the players' association may be able to stop the game by setting up a picket line. Other unions would henor a picket line and then there would be no lights, no one to sell rickets, no ushers and no concessions," Langer said. "A lot more people are involved in a game than football blavers."

By Archaeologist-Sailor

Viking Seamanship Questioned

By Jan Sjöby

STOCKHOLM (IHT).—They were certainly seamen, the Vikings, and vicious foes in a pitched fight. There is ample historical and archaeological evidence to support those points. But were they really such brilliant navigators? Were the

of the world the best of their time? Archaeologist Sibylia Haasum, 39, in contrast to generations of romantic poets and scholars,

ships they sailed to the ends

thinks not. "Their ships were primitive," she maintains, "their rigs were clumsy and inefficient and they navigated by rules of thumb. She took this stand in her doctoral dissertation at the University of Stockholm.

Dr. Haasum holds a Swedish coastel waters master's ticket. She is an amateur diver and a voracious consumer of books on naval science and seafaring lore.

Origins

"After 20-odd years of offshore and inshore yachting, coupled building, aero and hydrody-namics, climatology and Old Norse linguistics," she says, "I became convinced that many of the theories and hypotheses on Viking shipbuilding, maneuvering and navigation simply couldn't be correct. They had been put forth by desk scholars without any feeling for, or firsthand knowledge of, ships and the sea. In addition, they had been quoting one another to a point where it was difficult to make out who was quoting

"The most important thing

Dr. Şibylia Haasum

about my paper, I believe, is its cross-disciplinary character," she went on, "I was fortunate enough to obtain a lot of valuable information from colleagues in pertinent fields."

In her dissertation, Dr. Haasum takes up the problem of clinkerbuilt (lanstrake may be a more descriptive term) boats. There two schools of thought: One that this construction method derives from a primitive basket or skin-boat, similar to the Irish curragh; another holds that the method developed from the log dugout. According to this latter theory, splashboards were added, one by one, eventually reducing the original log to a keel. Dr. Haasum accepts the dugout theory and she shows in her dissertation why-with pictures. The basket and skinboets, she believes, were the ancestors of carvel-built craft in which the hull planking is fitted edge-to-edge instead of overlapping as in clinker-built.

A cross section and detail of a Viking long boat showing its clinker-built or lap-

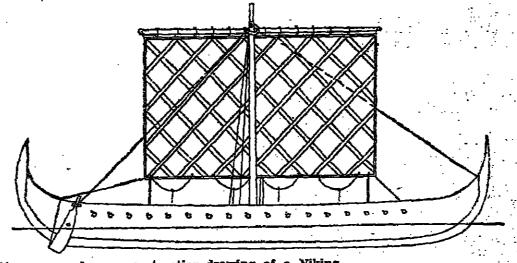

strake construction in which the exterior planks, or strakes, overlap one another.

Then she moves on to saik and rigging. The sails were, she most likely made of says, most likely made of radmal, a coarse woolen fabric, most unsuitable for sailmaking. Being parous, vadmal lets the wind through while absorbing spray and other moisture in the air and so becoming heavier and heavier. Fortunately for the Vikings, she notes, their sall plans were low and wide-2 single square-rigged sail carried on a yard attached to a stubby

Porther, she asserts, the diagonal gridiron patterns on the sails, as shown in "picture stones"—the only representation of pre-millernium Viking ships, may have been reinforcing strips; if so, the sail, bulging in a number of little pockets, would have lost even more in aerodynamic quality. For effi-ciency, a sail must be made to give a smooth curve like the upper surface of an airplane wing. The gridiron pattern is not shown in representations of William's dragon-boat fleet in the Bayeux tapestry.

Oars Needed

In a highly technical sequence of aero-hydrodynamic formulas and diagrams, Dr. Haasum indicates that Viking ships could hardly sail more than 20 degrees into the wind, at best, and then only if the sea was relatively calm. Doing this, she estimates that due to its leeway the craft would have been pushed some 10 degrees off the course heading. However, the Viking seamen may have known this and taken it into account. She notes that modern sailing cruisers can sail up to 40 degrees into the wind with a leeway slippage of about 5 degrees. For Viking sailors faced with a

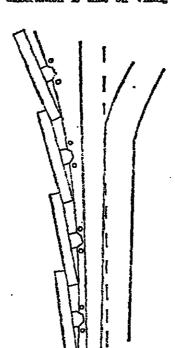

Above, a modern reconstruction-drawing of a Yiking long boat perhaps based on the "picture stone" rubbing at right. The loops on the lower edge of the sail were thought to have been used for trimming it.

headwind, ours must have provided a considerably better means of propulsion than their

In a discussion of climatological conditions in the centuries before and after the millennium, she points out that the now-prevailing westerlies of the North Atlantic were then prevailing easterlies, and that North Atlantic weather was considerably more clement in those days. A passage from Norway to Greenland, she says, could have been made in 12 days, and Ireland was a mere five days away from southern Iceland. Return trips would have taken longer, and eastbound crossings would have been laid out along a more southerly route.

An interesting chapter in the dissertation is that on Viking

ofishore navigation, cruds but curning, mainly by dead reck-oning and "latitude sailing." Ancient mariners were obviously able to tell cardinal points and set an east-west course by solar and stellar observations. Several scientists believe, Dr. Hassum points out, that the "sunstone" mentioned in the sagas may have been an early version of the Kollman sky compass, used aboard today's long-haul jetliners. The active agent is a type of quartz found in Norway and Iceland, able to polarize sunlight and enabling a navigator to pinpoint the sun in cloudy weather.

Guideposts

But most or much of the navigation, Dr. Haasum believes, was done by optic, olfactory or acoustic observations. One smells land from far away, the barking of a dog carries a long way over open water. The presence of birds, seals or wholes were guideposts to men who knew the waters. Driftwood and kelp indicated that land was near, Sunlight reflected off a glacier would form an "ice-blink" white spot on clouds overhead and the clouds themselves were helpful, tending to form over land. Smoke from the Greenland volcances could be seen from afar. Other points of reference were ocean swells and the steady landnords

'Navigational accuracy cannot have been especially impressive by modern standards," says Dr. Hassum, "but no great degree of accuracy was really needed. Distances along the more or less established transatlantic routes were relatively short and targets like the Faroes, Iceland and Greenland were big and tall and could be spotted from way offshore."

The shape of the ships is

reviewed, verbally and graph ically, from archaeological finds and reconstructions, from stone and bone carvings, from ancient coins, from the Bayeux tapestry. Dr. Hassum questions some of the representations, believing that the artist may have been aiming for sestbetic effect rather than documentary accu-

Successful

The Viking ships, whether sleek, shallow-draft longships or deeper, broadbeamed traders, were, despite their shortcomings, successful in their time; Dr. Haasum believes. (However, she notes that British scholar A. Moore charges that they were not much better than those used in the Mediterranean 3,000 years ealier and she doesn't contest that statement.) Still. they couldn't keep up with the times and were, within a few centuries, replaced by safer craft with greater cargo ca-"The picture of that super-

naturally capable Viking Who sailed the world's best ship across the world's most dangerous oceans is not correct." Dr. Hassum concludes in her paper. But they are definitely worth all due respect for making those transatiantic passages in open boats, primitively rigged, without reasonably accurate navigational aids."

Dr. Hassum's amply illustrated 136-page dissertation—with an 11-page summary in English—has been published by the Institute of Archaeology at the University of Stockholm.
